PART 1 — WELCOME TO SALEM

What the app is, what we are trying to do, and how it works.

1.1 What this app is

Katrina's Mystic Visitors Guide is a walking companion for historic Salem, Massachusetts. You walk the streets; the places around you **speak**. Narrators' voices — built from real people's recordings and AI-simulated, with their permission — tell you the story of the building in front of you, the people who lived there, and what happened in Salem in 1692 — at the moment you arrive, without you having to look at the screen.

Your guide is **Katrina**, a grey-and-white cat with a taste for mystery. She appears on the opening screens, in the welcome menu, and on the badges you collect along the way.

The opening splash, and the welcome screen with its three ways into Salem.

1.2 What we are trying to do

Salem is one of the most storied small cities in America — and most visitors only ever see a fraction of it. We built this guide to give you **a taste** of what is here: the architecture, the people, the 1692 witch trials, the sea

captains and the merchants, told well and told on the spot. It is meant to send you **towards** the real Salem — its museums, its historic houses, its guides and its shops — not to replace them.

- **Take nothing.** The app has no internet permission. It collects nothing about you, shows no advertising, and has no analytics or tracking.
- **Give first.** Everything — the map, the photographs, the stories and every voice — is already on your phone the moment it is installed.
- **Tell it straight.** The history is researched and cited. The narrators tell you exactly who they are and how their voices were made (see *Our Voices*, section 3.1).

1.3 How it works, in one minute

1. **Open the app in Salem.** It asks for your location once. The map centres on you.
2. **Walk.** When you come close to a place with a story, a banner slides up from the bottom of the screen and Katrina's narrators begin to speak. Keep walking — or stop and listen.
3. **Tap the banner** to open the full story card: photographs, the written story, and more to hear.
4. **Want a plan?** Open the menu grid and choose **Tours**. Pick a walking tour and follow the line on the map; the stories play as you reach each place.
5. **Not in Salem yet?** Choose **Simu-Walk**. The app walks the tour for you, so you can hear it from anywhere.
6. **Collect ghosts.** Each historic place you hear joins **Katrina's Collection** as a ghostly badge.

1.4 What you need

- An Android phone or tablet with the app installed **from Google Play**. (If you see a "Please reinstall from Google Play" screen, see 3.19.)
- Location turned on, with permission granted **"While using the app"**. Precise location gives the best results.
- **Your ringer ON.** If the phone is on silent or vibrate, the narrators stay quiet. This is the single most common reason for "it isn't talking".
- Headphones or a low speaker volume — enough to hear the story *and* the traffic.
- No mobile data and no Wi-Fi are needed.

1.5 Your privacy

In the app's own words (About screen): *“This app has no internet permission. It sends nothing to us, collects nothing about you, and has no advertising, analytics or tracking. To confirm your purchase, it may ask the Google Play Store app on your phone, which checks with Google under Google's own terms and privacy policy. Because some US states require it, the app may also ask the Google Play Store app for your age range and, if a parent supervises your account, whether they approved. The answer stays on your phone, is used for nothing else, and is not kept.”* The full policy is linked from About → **Privacy Policy**.

- Your location is used on the phone only — it is how Salem knows when to speak. It never leaves the device.

- The places you have heard (your Collection) and your favourites are kept on the phone only, and are not copied to cloud backups.
- No account, no sign-in, no email address.

PART 2 — THE FEATURES

Everything the guide can do, explained in plain language. Part 3 shows every button in detail.

2.1 Ambient narration — Salem speaks as you walk

You do not have to start anything. With the app open and your location on, the guide listens for the places around you. When you come within **announce range** of a place and stay there for a few seconds, it speaks.

- **Historic places** tell their story in Dr. K's voice: first the name, then the opening of the story, then further sections one after another.
- **Other places** simply announce themselves — a short line with the name and what kind of place it is.
- The **narration banner** slides up from the bottom while a place speaks. Tap it for the full story card.
- If several places are close together, they **queue**. A new place never interrupts one that is already speaking; it waits its turn. If you walk away from a waiting place, it drops out of the queue.
- Historic stories come first, then place announcements, then the Oracle newspaper (2.7) fills the quiet moments.
- A place does not repeat itself for **two hours**, so you can wander back and forth without hearing the same story again. (You can reset this — 3.11.)

> **You are in charge of what talks.** The speaker button's long-press opens **Audio controls**, where you choose which kinds of places speak (historic, parks and schools, businesses, the Oracle), how close you need to be, and how much detail you hear. Tap the speaker once to silence whatever is playing.

2.2 Taking a tour

A tour is a walking route through Salem, drawn on the map as a **green line**. The part you are walking now is highlighted in **blue**. As you reach the places along the way, their stories play.

- Open the menu grid and tap **Tours**, or tap **Guided Walking Tours of Salem** on the welcome screen.
- Each tour card shows how many **ghosts** you can collect on it, how long it takes, how far it goes, and how hard it is.
- Tap **Start Tour**. If you are in Salem with your location on, the guide asks where to begin — **Take me to the start** draws walking directions to the first point, **Start right here** begins from where you stand.
- If you are not in Salem (or your location is off), it offers to **walk it for you** instead — that is Simu-Walk (2.3).
- The line at the top of the map shows *“Tour: <name>”* while the tour runs.
- To pause, end, or look at the tour's collection, open **Tours** again while the tour is running.
- Hear every ghost on a tour and it ends by itself with a *“Tour Complete!”* summary.
- Want something different? **I Have X Minutes** builds a tour that fits your time, and **Build Your Own Tour** lets you tick the places you want.

2.3 Simu-Walk — the simulated walk

Simu-Walk lets you **hear a tour without walking it** — at home, on the train, in your hotel. A walker moves along the tour route at a steady walking pace, and every story plays exactly as it would on foot. The walker even pauses at each place while it speaks.

- Start it from the menu grid: tap **Simu-Walk** and choose a tour. Or answer **Yes, walk it for me** when you start a tour away from Salem.
- While it runs, the **Simu-Walk** icon in the menu grid turns **gold**, and the **GPS** button shows grey (the app is following the walker, not your phone).
- Stop it any time: tap **Simu-Walk** again, tap anywhere on the map, tap **Home**, or end the tour.
- Ghosts heard on a Simu-Walk count towards your Collection, just like on foot.

2.4 The round map buttons and what they mean

Five round buttons sit on the left edge of the map. Each one is a switch; its label is **green** when it is on and grey when it is off.

Button	What it does	On / off
3D	Tilts the map into a walking view. Each tap leans it further (30°, 36°, 42°, 48°), then back to flat.	A message shows the angle. Flat = 0°.
GPS	Follows your real location. Turn it off to look around the map without it snapping back to you.	Green = following you. Grey = off (or a Simu-Walk is running).
POI	"Points of interest". Off shows the historic and civic highlights; on shows **every** place — shops, food, services — and lets businesses announce themselves too.	On = *“Showing ALL POIs · business audio on”*. Off = *“Historic sites only · business audio off”*.
N↑	Heading-up. Turns the map so the direction you are walking points up the screen.	Off = north is always up.
🔍 **1×**	Magnify. Makes everything on the map bigger — 1×, 1.5×, 2×, 2.5×, 3× — without changing the zoom level.	The label shows the current size.

2.5 Katrina's Collection

Every historic place with a ghost becomes a **badge** when you hear its story. Uncollected ghosts are grey shadows; collected ones appear in full colour in a decorative frame, with how many times you have heard them.

- Open it with the **witch-hat** button at the top of the map.
- Each tour has its own collection; **Switch collection** moves between them and **All**.
- The counter (for example *“1 / 39”*) shows ghosts caught out of the total.
- Want to start again? The ⋮ menu has **Reset collection** (this cannot be undone).

2.6 The Salem Witch Trials of 1692

A whole history library, reached from the menu grid (**Witch Trials**) or the welcome screen. It opens with **Today in 1692** — what was happening in Salem on today's date 334 years ago — and four ways in:

- **The Salem Witch Trials History** — the story told in sixteen chapters, from the village before 1692 to the long memory after it.
- **The Oracle Newspaper** — the crisis as a period newspaper, day by day (2.7).
- **The People of Salem 1692** — judges, accusers, accused, clergy and officials, each with a portrait and biography.
- **Historic Sites of Salem** — historic buildings, home sites, cemeteries and landmarks, filtered by era.

Every chapter, biography and newspaper can be read on screen or **heard** with its **▶ Speak** button. Names and dates in gold are links — tap a name to open that person's biography.

2.7 The Oracle Newspaper

The Oracle tells the story of the witch trials as if it were being reported at the time — dated dispatches from November 1691 to May 1693, each with its own woodcut illustration, voiced by Dean.

- **Read it** in the Witch Trials library: browse by date or by phase of the crisis, and use **‹** and **›** to move between days.
- **Hear it while you walk**: turn on **Oracle Newspaper** in Audio controls. The Oracle then reads dispatches in date order during the quiet moments between places, and steps aside whenever a place starts to speak.
- The Oracle switch starts **off** each time you open the app — turn it on when you want it.

2.8 Find

Find is the guide's directory: every place on the map, sorted into picture tiles — Historic Places, Food & Drink, Shopping, Lodging, Parks & Rec, Witch & Occult Shops and more — plus your **Favorites** and **Recents**. Type in the search box to look up a place by name or keyword. Tap a result to fly the map there; long-press it to open its card. **Filter and Map** shows just those results on the map.

2.9 The 1851 map

Swap the modern map for a **real 1851 city map of Salem** (by Henry McIntyre, from the Boston Public Library's Leventhal Map Center), carefully fitted to today's streets. Your position, the places and the narration all keep working on top of it. Open the menu grid, tap **Maps**, and choose **1851**. A gold-edged **1851** tag on the map reminds you which map you are on — tap it to switch back.

2.10 Pocket mode

Normally the guide speaks while its screen is on. Turn on **Pocket mode** in Audio controls and it keeps following your walk and telling stories **with the screen off and the phone in your pocket**. A quiet notification, *“Katrina is narrating your walk”*, shows while it runs; its **Stop** button silences the guide and stops following your location. Back in the app, tap **GPS** to follow you again.

PART 3 — EVERY SCREEN AND CONTROL

A complete walk-through of the guide, screen by screen. Numbered pink markers on each picture match the numbered rows beside it.

3.1 First launch

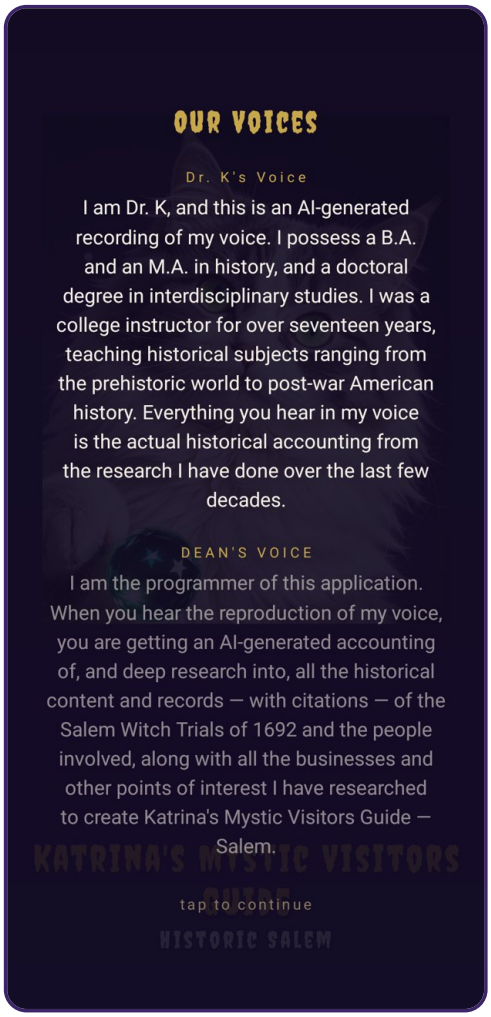

The very first time you open the guide, a short sequence plays. After that, the app opens straight to the map.

Each time it opens, and because some US states require it, the guide may ask the Google Play Store app for your age range. The answer stays on your phone, is used for nothing else, and is not kept.

The splash

One of Katrina's portraits fills the screen and slowly zooms while a short welcome plays in Dr. K's voice. The title **Katrina's Mystic Visitors Guide — Historic Salem** fades in. On the very first launch the line under the title may read *“Preparing your offline map…”* while the maps unpack. **Tap anywhere** to skip ahead.

Our Voices

"Our Voices" — Dr. K's paragraph lit while her recording plays.

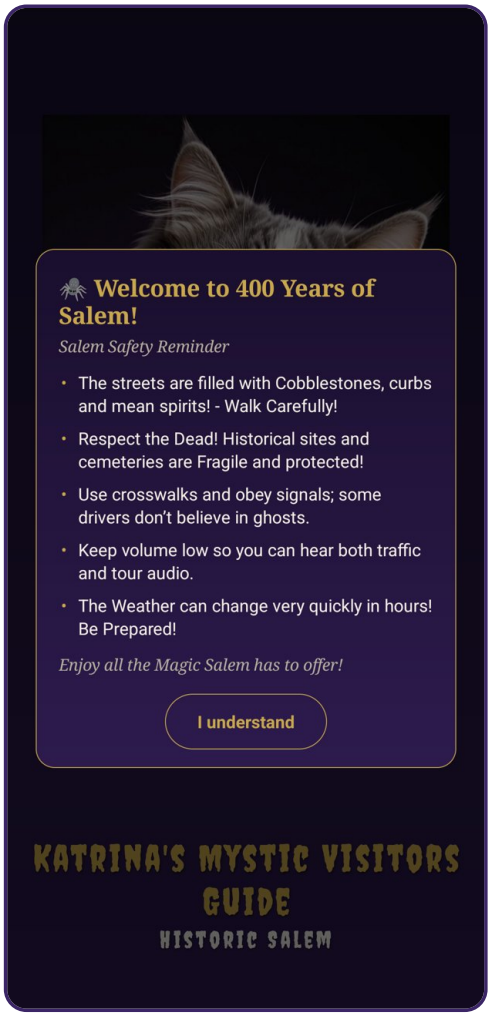

Shown **once** after installing. The two narrators introduce themselves, and each paragraph lights up while its recording plays:

- **Dr. K's Voice** — *“I am Dr. K, and this is an AI-generated recording of my voice…”* Dr. K is a historian; her voice tells the historical stories.
- **Dean's Voice** — *“I am the programmer of this application…”* Dean's voice reads the Oracle newspaper, the Salem places and the safety reminder.

Tap anywhere (*“tap to continue”*) to move on.

> **About the voices.** Both narrators are real people whose voices were AI-simulated, with their permission, from their own recordings. The About screen says the same.

The Salem Safety Reminder

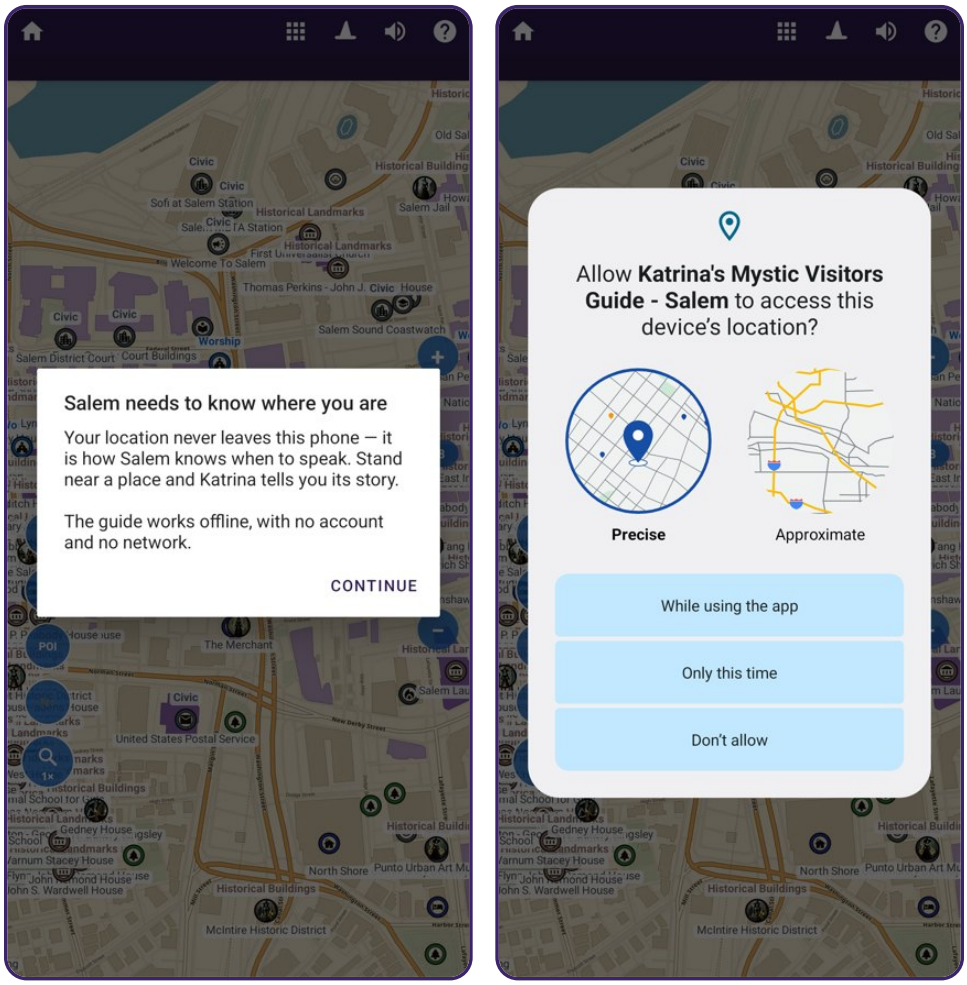

The Salem Safety Reminder — read aloud by Dean. Only "I understand" closes it the first time.

Read aloud by Dean the first time you open the app (and again whenever its wording changes):

- The streets are filled with cobblestones, curbs and mean spirits — walk carefully!
- Respect the dead — historical sites and cemeteries are fragile and protected.
- Use crosswalks and obey signals; some drivers don't believe in ghosts.
- Keep the volume low so you can hear both traffic and tour audio.
- The weather can change very quickly — be prepared.

Tap **I understand** to continue. You can read it again any time from **About → Salem Safety Reminder**.

Location permission

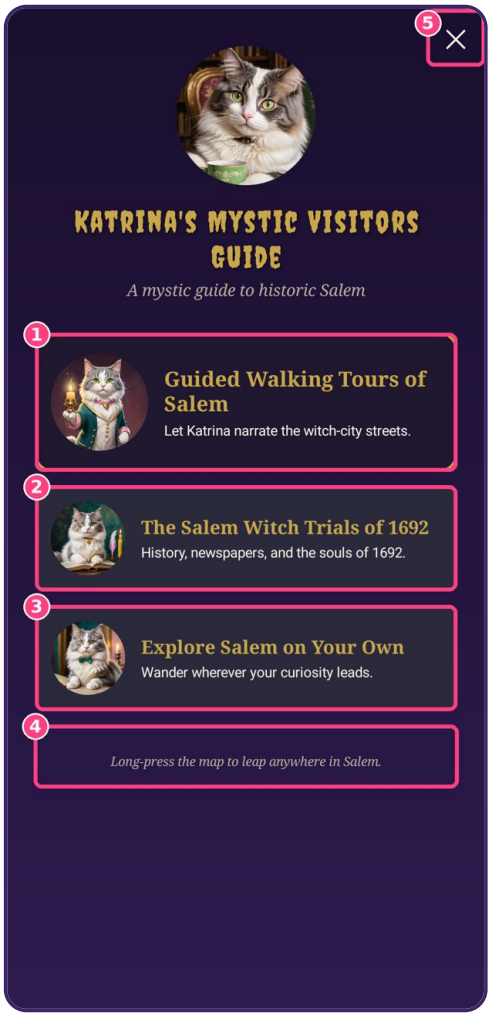

Left: the guide explains why it needs your location and tap CONTINUE. Right: Android's own question — choose "While using the app" (Precise is best).

The guide asks for your location **once**. First its own explanation — *"Your location never leaves this phone — it is how Salem knows when to speak."* — then Android's permission box. Choose **While using the app**. Choosing **Don't allow** keeps the map and the library working, but places cannot speak as you walk; the top line then offers *"Location permission needed — tap to fix"*.

> **Outside Salem?** If your phone is far from Salem when you open the guide, a message says how far away you are (for example *"You're about 12 miles from Salem"*). The map parks itself on Salem, location tracking pauses, and it switches itself back on the moment you arrive (*"Welcome to Salem — location is back on."*). Tap **Continue**.

3.2 The welcome screen

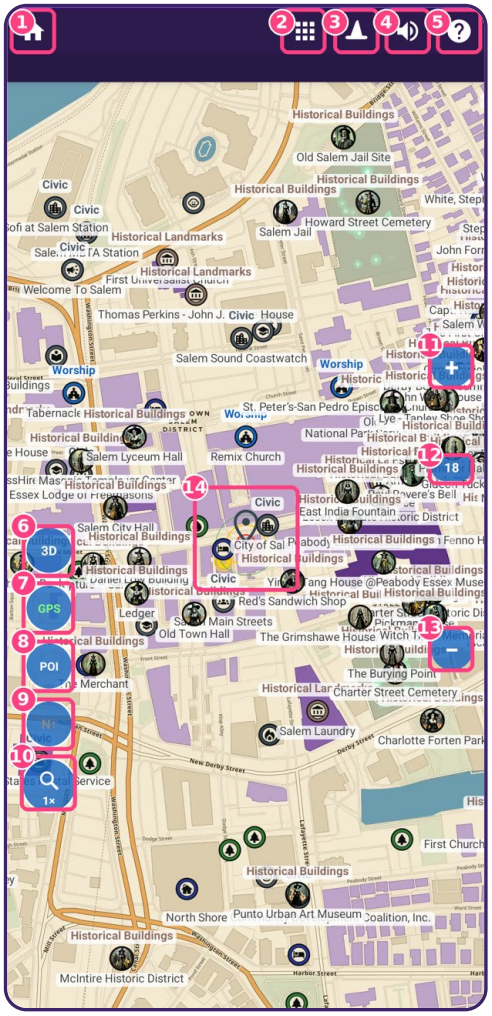

The welcome screen appears each time you open the guide.

1	**Guided Walking Tours of Salem**	*"Let Katrina narrate the witch-city streets."* Opens the Walking Tours list (3.13).
2	**The Salem Witch Trials of 1692**	*"History, newspapers, and the souls of 1692."* Opens the Witch Trials library (3.15).
3	**Explore Salem on Your Own**	*"Wander wherever your curiosity leads."* Closes the welcome screen and leaves you on the map — the stories find you as you walk.
4	**Hint**	*"Long-press the map to leap anywhere in Salem."* (See 3.6.)
5	**× Close**	Closes the welcome screen. The Back key does the same.

If you left a tour paused, a gold **Continue Tour** card also appears here — *"<tour> · pick up where you left off"*. Bring the welcome screen back any time with **About → Show welcome**.

3.3 The main map

Everything starts here. The map is Salem's own hand-styled street map, stored on the phone. Historic buildings appear as small ghost portraits; other places carry a coloured ring that matches their category (see the Legend, 3.17). Place names appear when you zoom in close.

The main map, with every control numbered.

1	**Home**	Tap: fly to your saved home point. Long-press: save the map centre as home. (3.4)
2	**Menu grid**	The nine-dot menu: Find, Maps, Narrator, Tours, Simu-Walk, Witch Trials, Legend. (3.7)
3	**Collection**	The witch hat: Katrina's Collection. (3.14)
4	**Speaker**	Tap: stop or replay narration. Long-press: Audio controls. (3.11)
5	**About**	The ? button: About, Help, notices. (3.18)
6	**3D**	Tilt the map. (3.5)
7	**GPS**	Follow your location on / off.
8	**POI**	Highlights only / every place. Long-press: map layers.
9	**N↑**	Heading-up on / off.
10	**Magnify**	1× – 3× bigger map symbols.
11	**+ (zoom in)**	One zoom level closer. (3.6)
12	**Zoom level**	The bubble shows the level; drag along the track to scrub.
13	**− (zoom out)**	One zoom level further.
14	**You**	Your position — the pin with three coloured rings (red, yellow, green) showing the announce ranges.

The line under the top bar

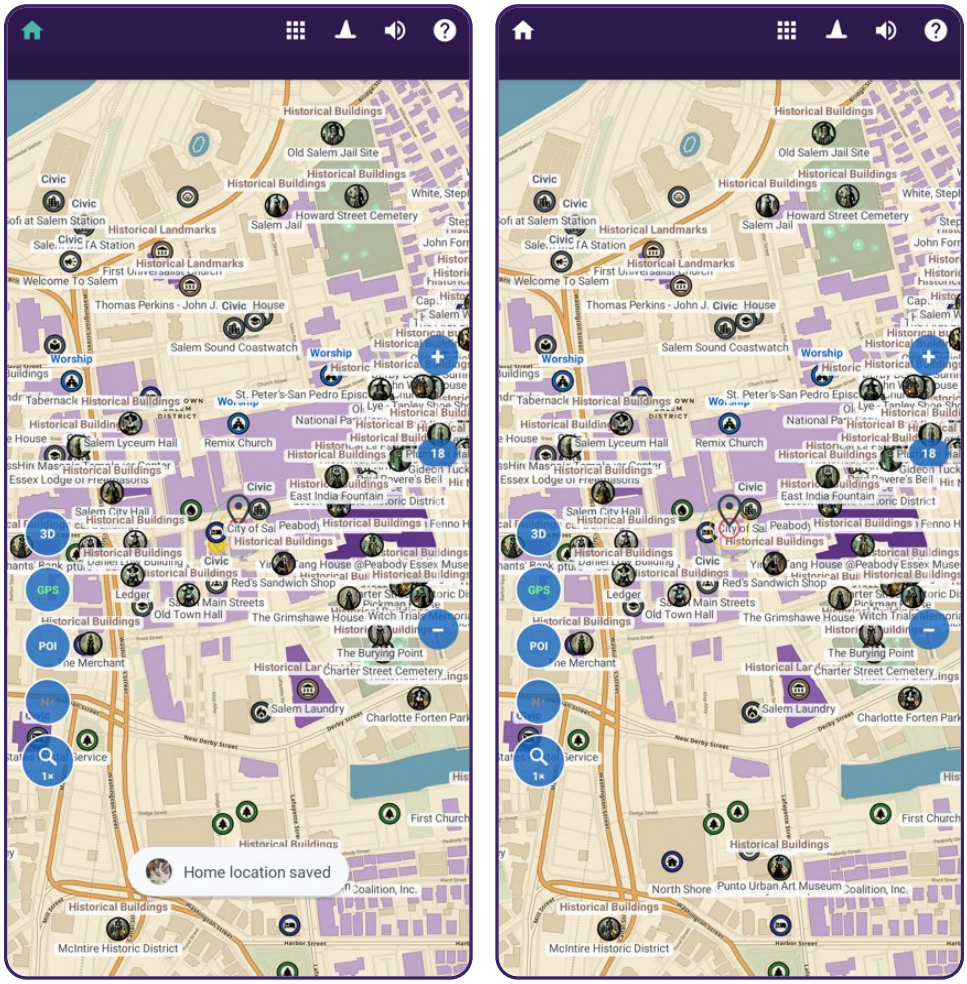

A slim status line under the top bar carries the most important message of the moment. Some of them can be tapped:

It says	Meaning / what a tap does
“Tour: <name>”	A tour is running.
“▶ Resume — <name>”	A tour is paused. Tap to resume it.
“Detour → <place>”	You are on a detour from your tour (3.9).
“Showing N <category> — tap to clear”	The map is filtered by Find. Tap to show everything again.
“Location permission needed — tap to fix”	Opens the settings to grant location.
“Location is off — tap to turn on”	Opens the location settings.

“Location is approximate — tap for precise GPS”	Opens settings to switch on precise location.
“Battery saver is limiting GPS — tap to adjust”	Opens battery settings.

3.4 The top bar

Home

Long-press Home: "Home location saved" and the house icon turns teal.

- **Tap** — the map flies to your saved home point (zoom 18). With no home saved, it goes to your current position, or says *“No GPS fix yet — long-press Home to set”*. Tapping Home also stops a Simu-Walk.
- **Long-press** — saves the centre of the map as home (*“Home location saved”*; the icon turns teal). Long-press again to clear it (*“Home location cleared”*). Handy for your hotel or your car.

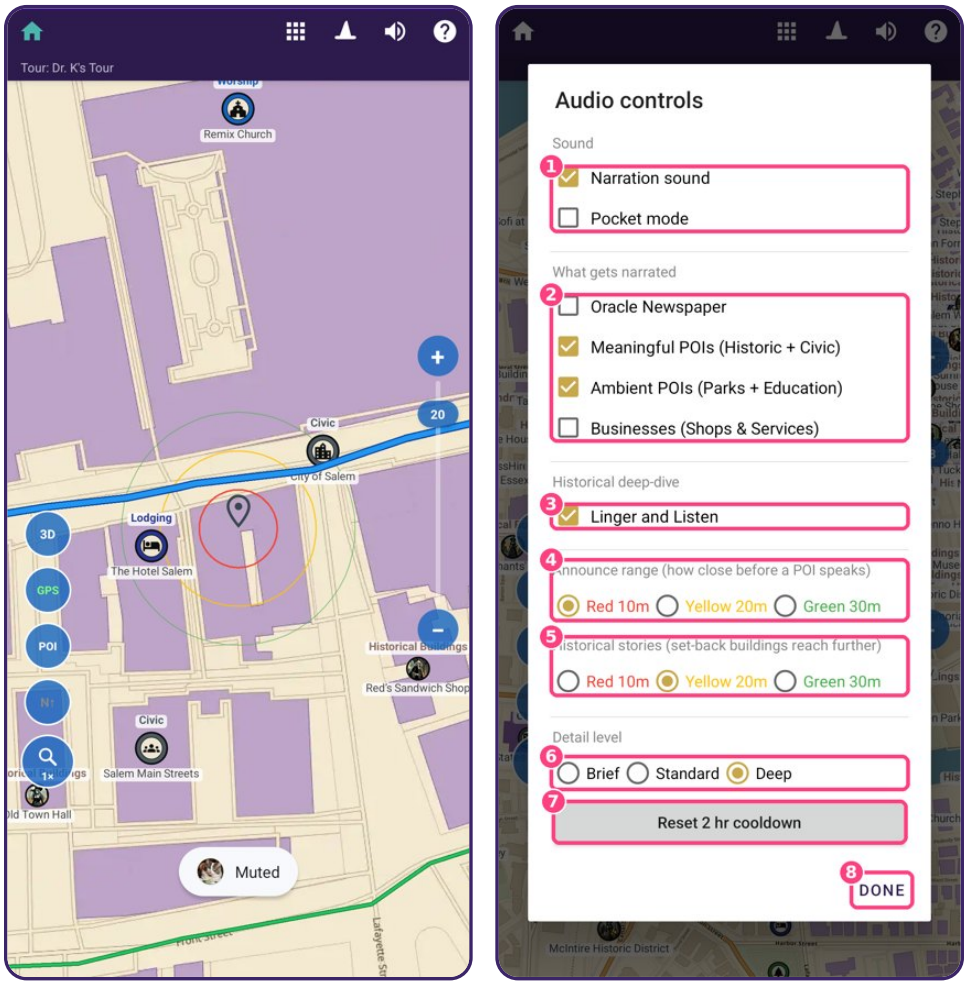

Menu grid (nine dots)

Opens the menu grid — see 3.7.

Collection (witch hat)

Opens Katrina's Collection (3.14). During a tour it opens straight to that tour's collection.

Speaker

Tap the speaker to silence narration ("Muted"); long-press it for Audio controls.

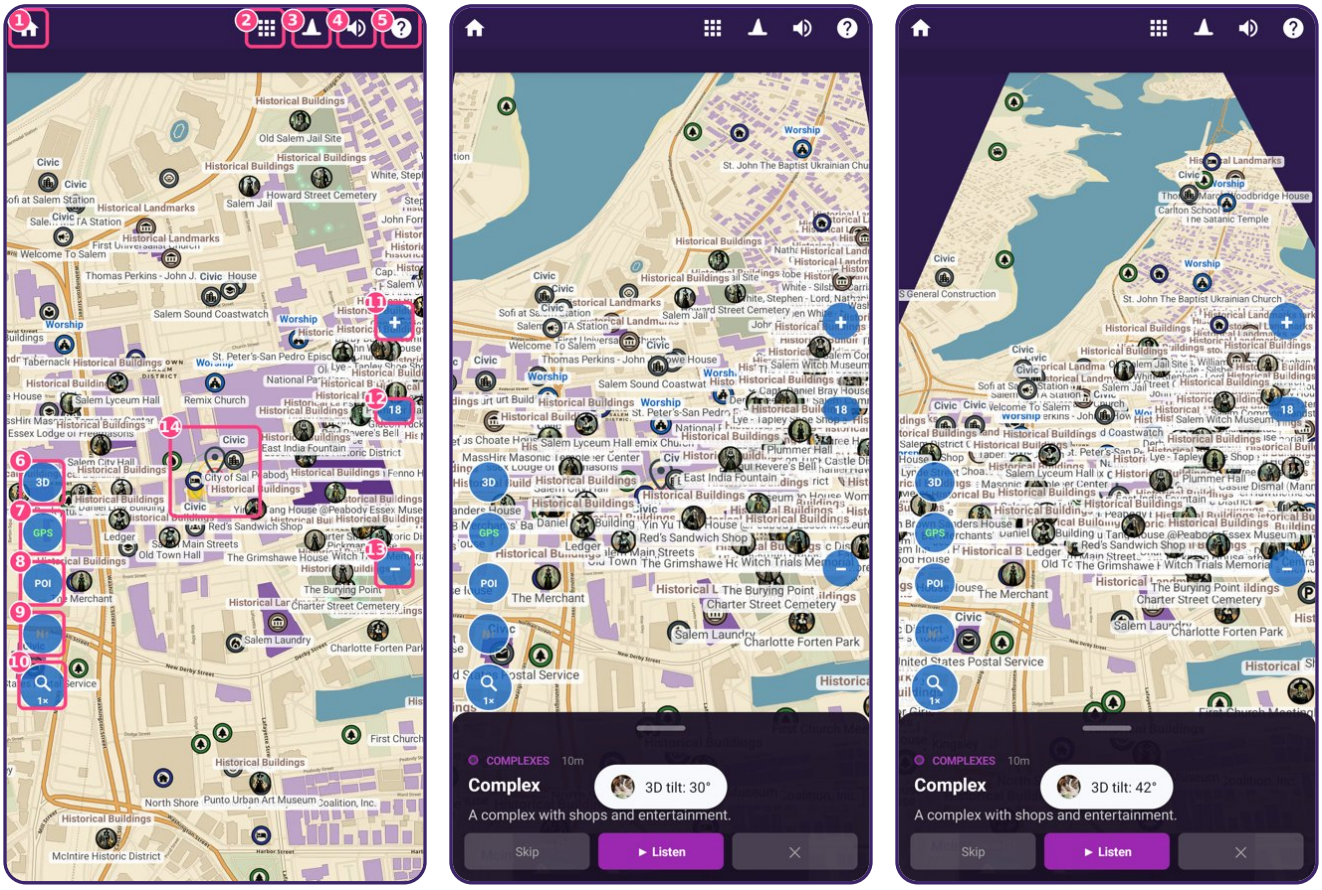

- **Tap while something is speaking** — stops it (*"Muted"*).
- **Tap when it is quiet** — replays the last story you heard, or says *"Nothing to replay yet"*.
- **Long-press** — opens **Audio controls** (3.11).

About (?)

Opens the About screen, with Help, the safety reminder, privacy, credits and the open-source notices (3.18).

3.5 The round map buttons (detail)

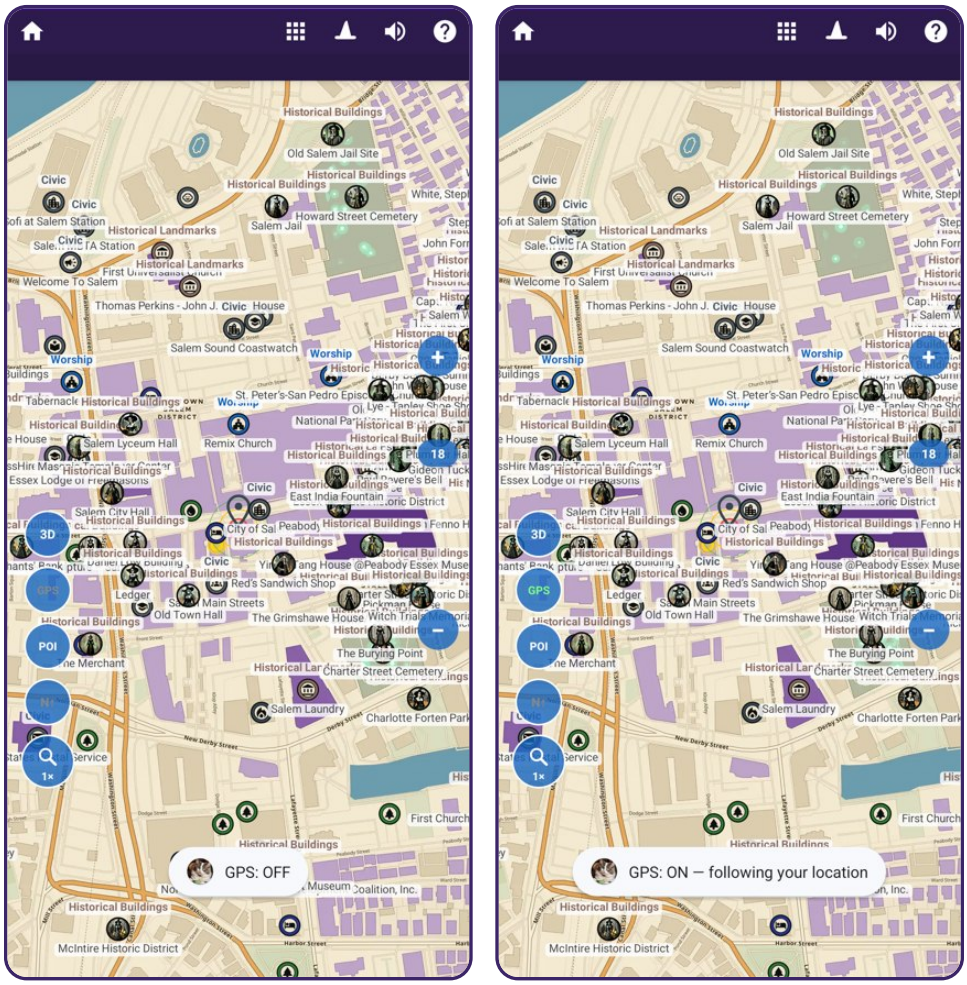

3D — tilt

Flat, 30° and 42°. Each tap of 3D leans further: 30° → 36° → 42° → 48° → flat.

Each tap leans the map back, like looking ahead down the street: **30°, 36°, 42°, 48°**, then flat again. A message shows the angle (*“3D tilt: 30°”*). The angle is remembered next time.

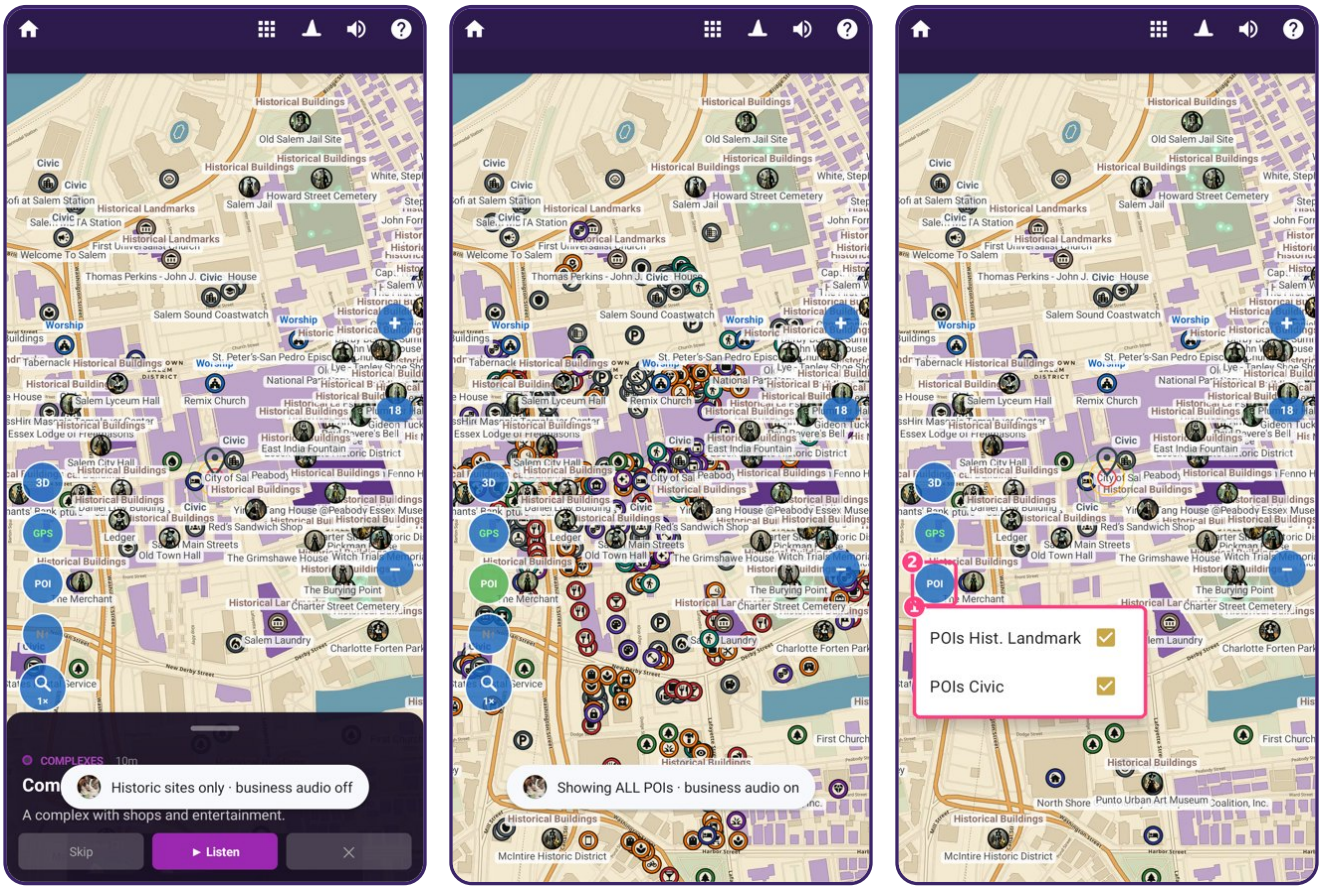

GPS — follow me

GPS off ("GPS: OFF", grey label) and on ("GPS: ON — following your location", green label).

- **On (green)** — the map follows you; places speak as you reach them. *“GPS: ON — following your location”*.
- **Off (grey)** — the map stays where you leave it, so you can explore without it snapping back. *“GPS: OFF”*.
- If you are in Salem with GPS off and the phone is moving, the label **pulses yellow** as a reminder.
- GPS starts on. If your first location is outside Salem, the guide turns it off itself and turns it back on when you arrive.

POI — every place, or just the highlights

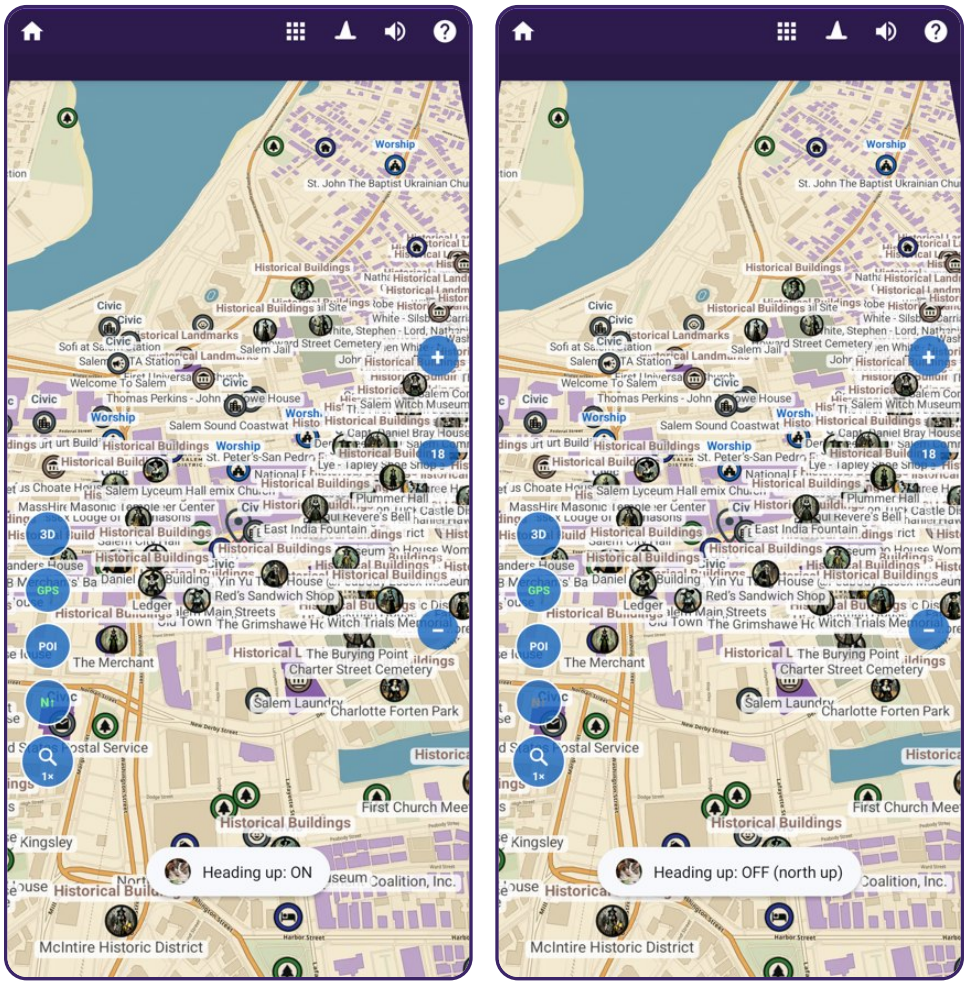

Left: off — historic and civic highlights. Centre: on — every place, with a message. Right: long-press for map layers.

- **Off** (the normal view) — historic buildings, landmarks, civic buildings, lodging and the places on your tour. Business announcements are off. Message: *"Historic sites only · business audio off"*.
- **On** — every place in the guide: shops, food, services, parks and more. Businesses announce themselves too. Message: *"Showing ALL POIs · business audio on"*.
- **Long-press** — a small menu with two switches: **POIs Hist. Landmark** and **POIs Civic**. These show or hide those layers. Exploring and touring keep separate settings.

> **Complexes.** Buildings that hold several businesses (a "complex") have no pin of their own and stay quiet — until POI is on. Then a short line like *"A complex with shops and entertainment."* may play as you pass.

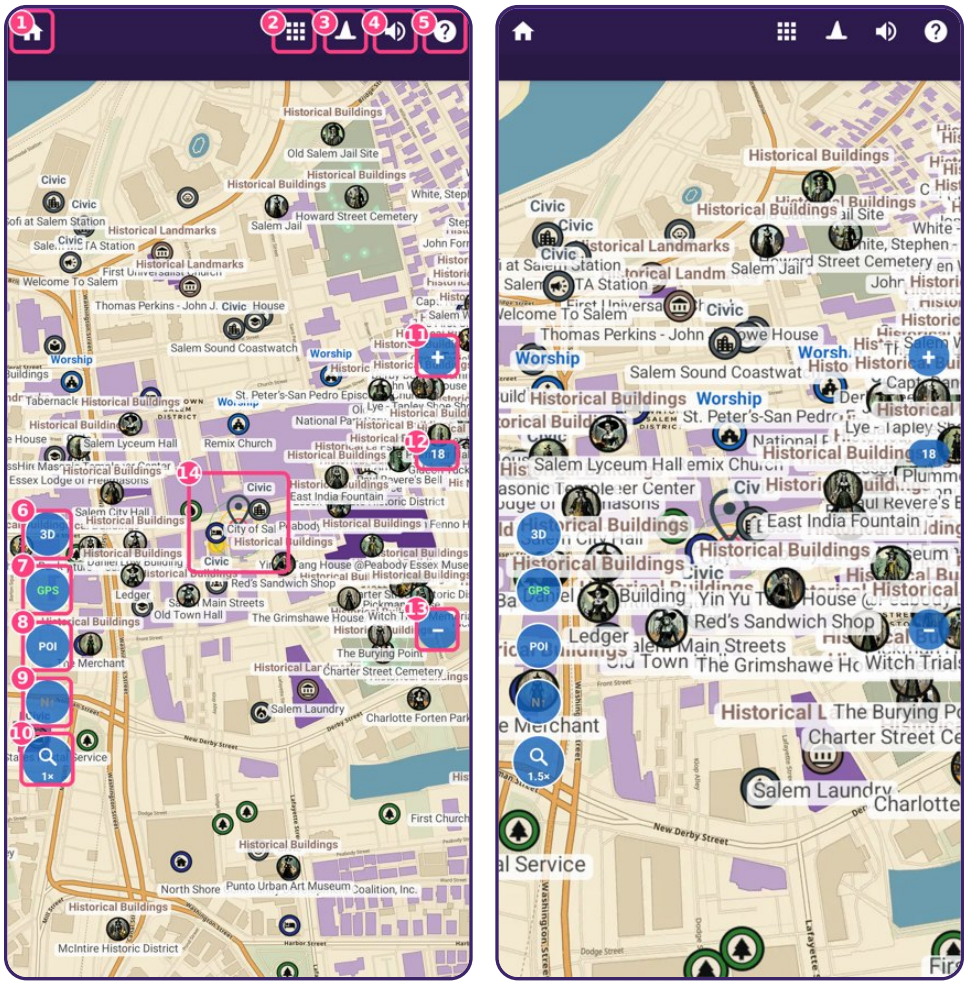

N↑ — heading-up

"Heading up: ON" and "Heading up: OFF (north up)".

On, the map turns so that the way you are walking points up the screen (it uses your movement, so it settles after a few steps). Off, north is always up — tapping it off snaps the map back to north at once.

Magnify

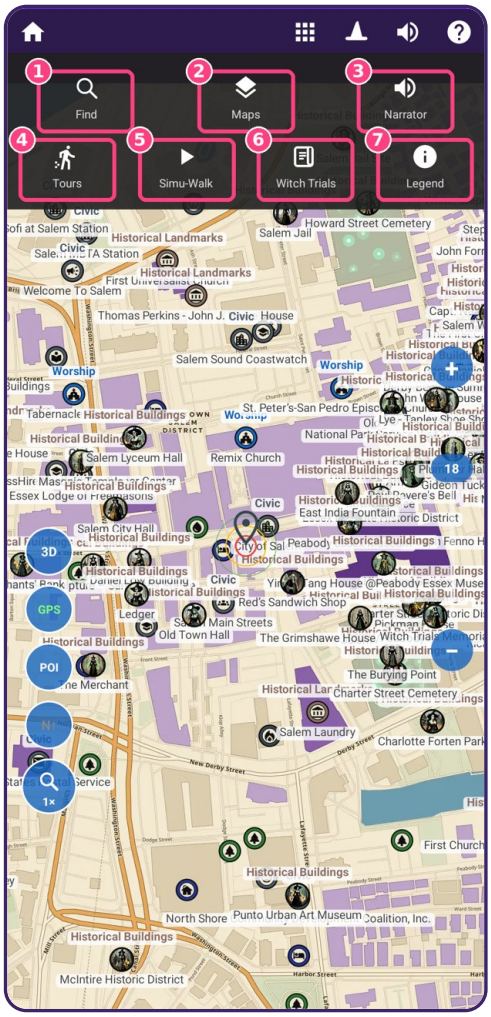

1× (normal) and 1.5×. The label on the button shows the current size.

Steps through **1×, 1.5×, 2×, 2.5×, 3×** and back to 1×. Everything on the map — streets, labels, icons — is drawn bigger, which helps outdoors in bright light. It does not change the zoom level.

3.6 The zoom slider and gestures

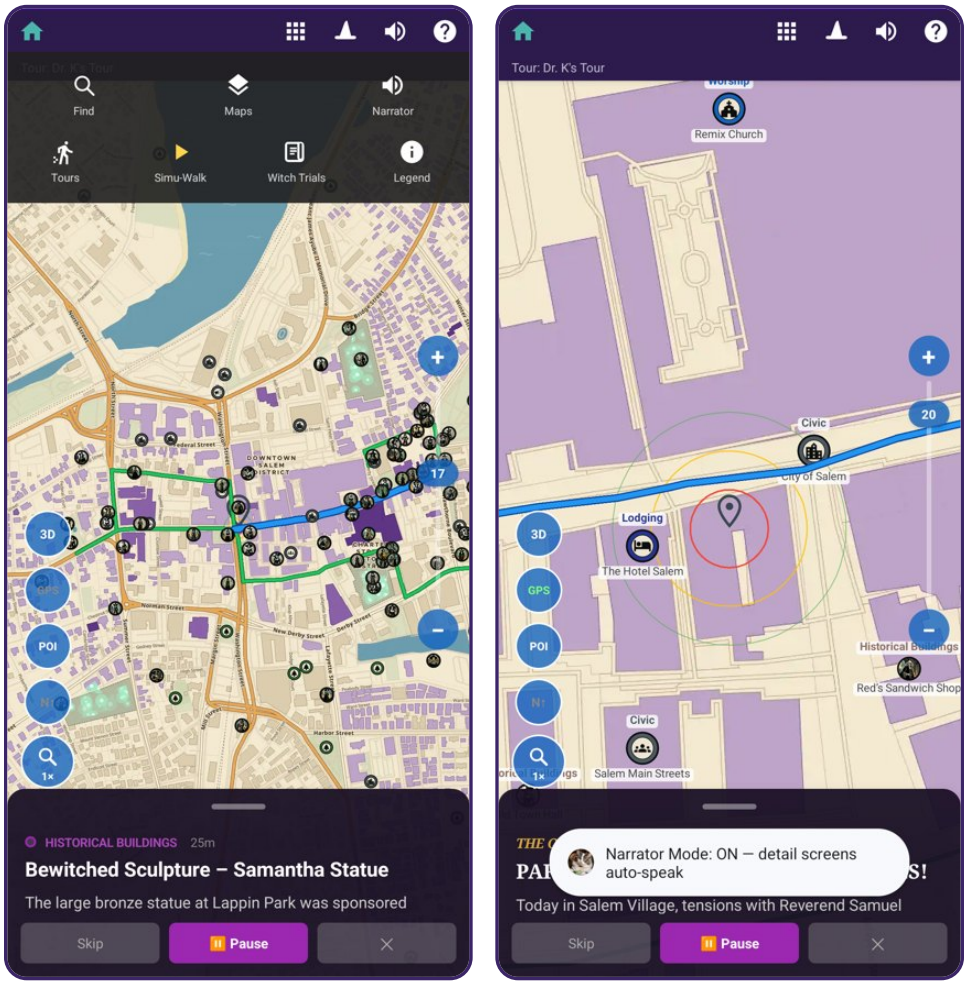

- **+** and **−** zoom one level at a time. The bubble between them shows the level (from 11, the whole area, to 21, a single doorway). Drag along the track to zoom quickly — up is closer.
- **Pinch** with two fingers to zoom; **drag** to move the map; **twist** two fingers to rotate it.
- **Tap a place** to open its card (3.9). Tap a cluster marker (*"N POIs"*) to zoom in on it.
- **Long-press anywhere** to leap there: the guide treats that spot as your position (*"Manual mode — searching POIs..."*) and the nearby places can speak — a quick way to sample a street before you go.
- **A single tap on the map** stops a running Simu-Walk.

3.7 The menu grid

The menu grid, opened from the nine-dot button.

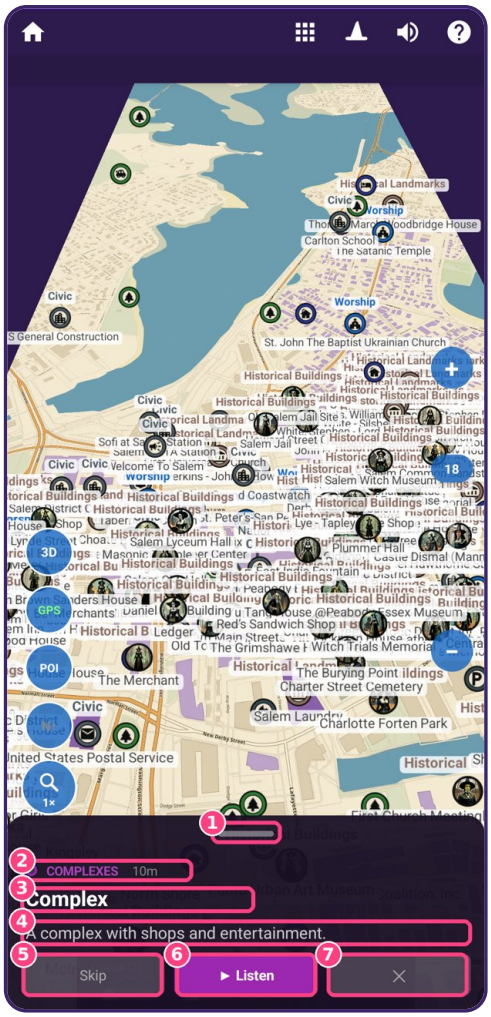

1	**Find**	The directory and search (3.12).
2	**Maps**	Choose the modern map or the 1851 map (3.16).
3	**Narrator**	A switch. On (icon gold), the Witch Trials chapters, biographies and newspapers **start reading aloud as soon as you open them**. *“Narrator Mode: ON — detail screens auto-speak”*. Starts off.
4	**Tours**	The Walking Tours list (3.13). While a tour runs, it opens the tour menu instead: Open Collection · Pause / Resume · End tour.
5	**Simu-Walk**	Start or stop the simulated walk (2.3). The icon turns gold while a walk runs.
6	**Witch Trials**	The Salem Witch Trials library (3.15).
7	**Legend**	What the map's colours mean (3.17).

Left: Simu-Walk gold while a walk runs. Right: turning on Narrator.

3.8 The narration banner

When a place (or the Oracle) speaks, the banner slides up from the bottom of the map.

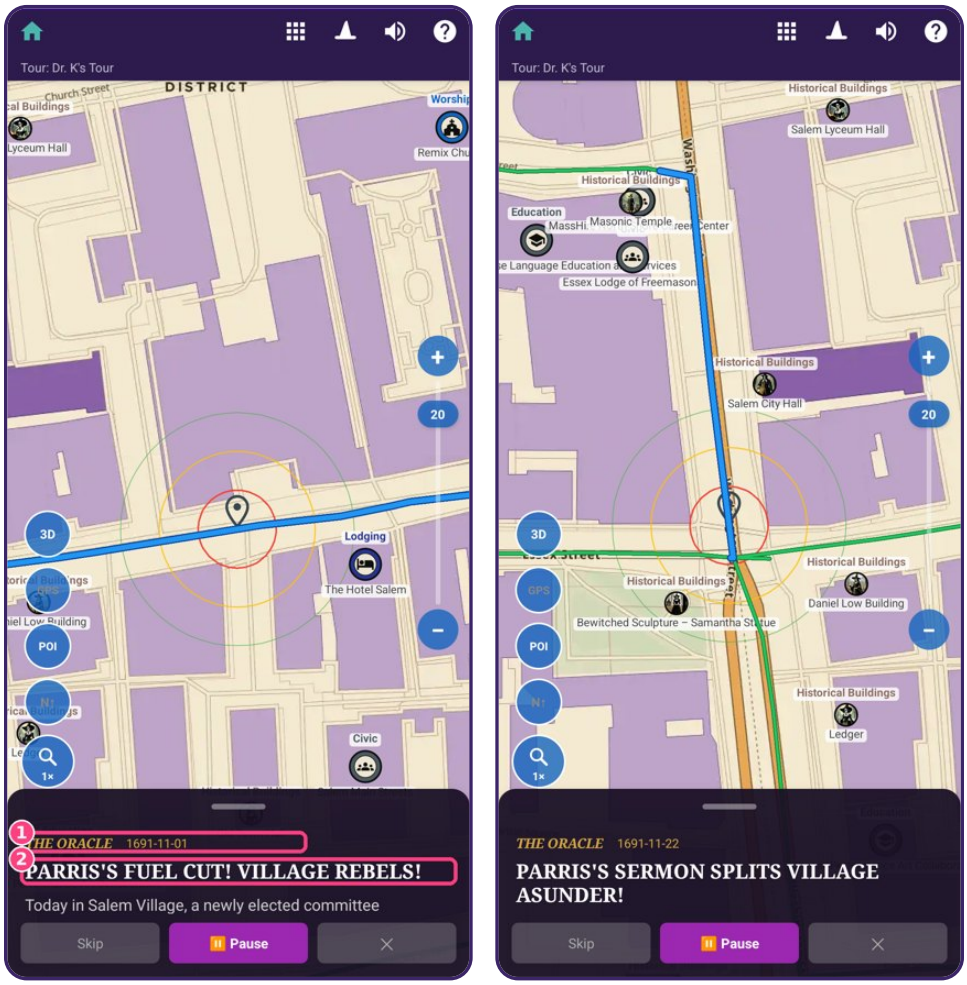

The narration banner.

1	**Handle**	Tap (or tap the picture, title or text) to open the full place card.
2	**Category · distance**	The kind of place and how far away it is.
3	**Name**	The place speaking now.
4	**Story**	The opening of what is being read. Story chips below it open extra sections.
5	**Skip**	Stops this story and hides the banner; the next place in the queue can speak.
6	**▶ Listen / ⏸ Pause**	Pause and resume the reading. The label follows what is playing.
7	**×**	Hides the banner but lets the story keep playing. (If the story is paused, × stops it and clears the queue.)

When several places are waiting, the banner adds *“N more nearby”*, and a **Queue** strip shows their icons and distances — tap one to open its card.

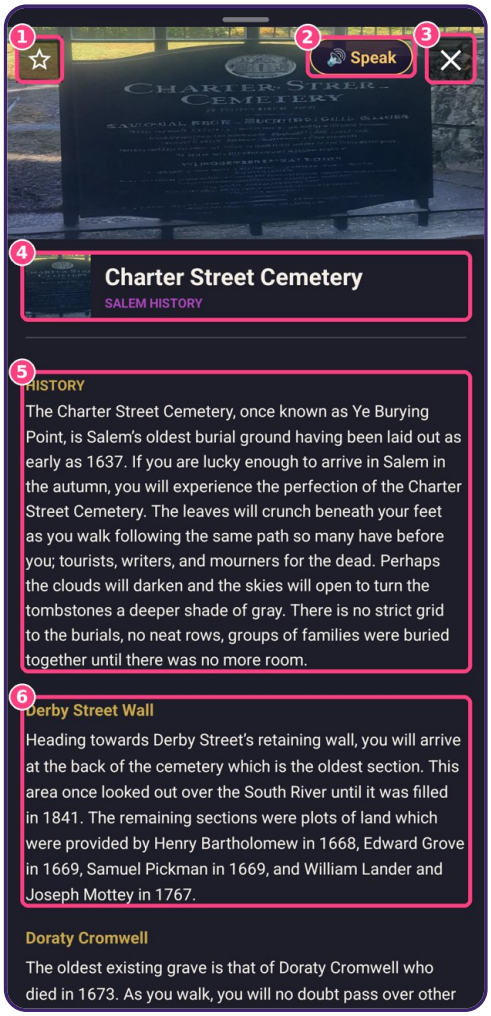

The Oracle version of the banner

When the Oracle speaks, the banner shows THE ORACLE, the dispatch date and the headline. Tap it for the full newspaper page.

3.9 The place card

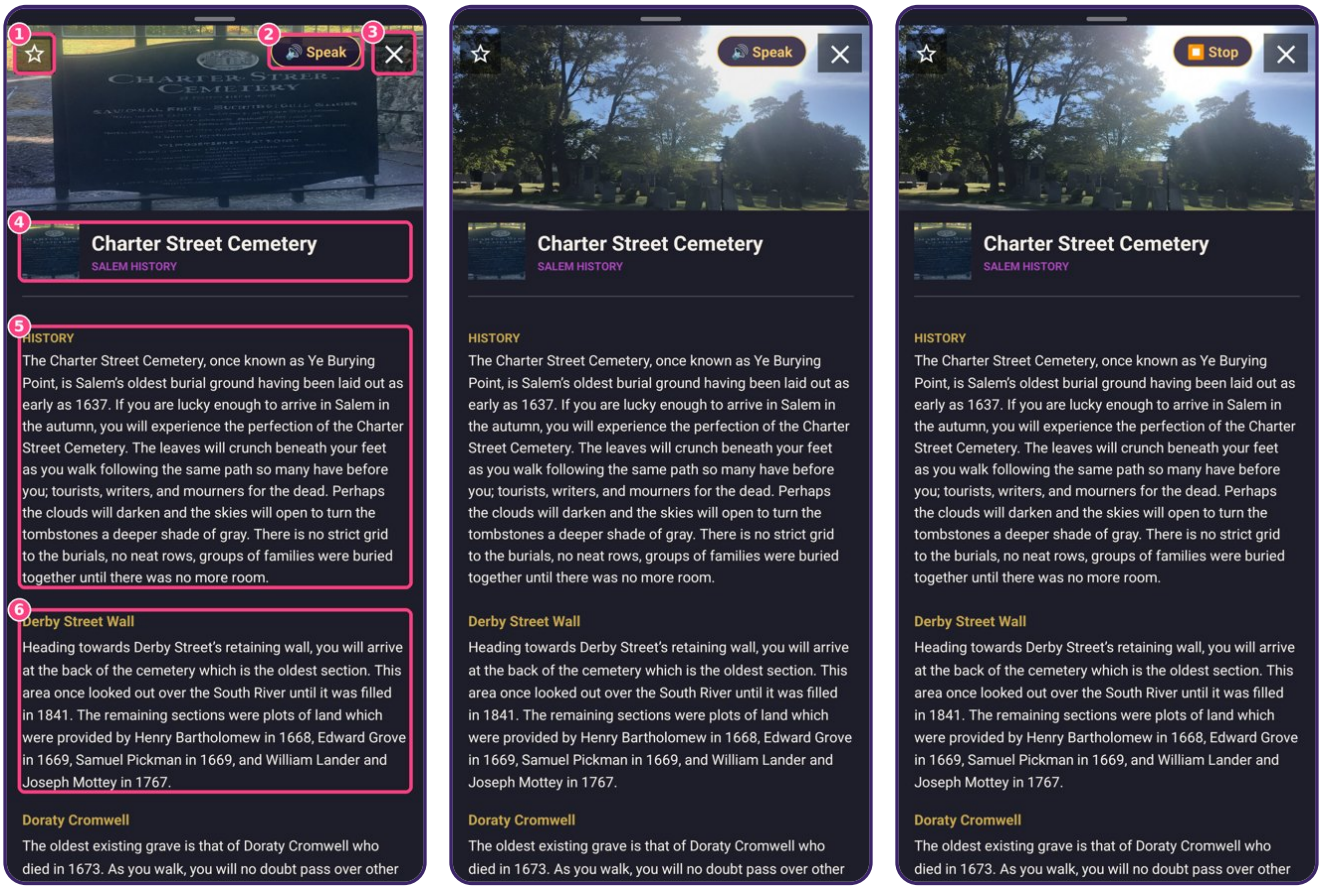

Open a card by tapping a place on the map, the narration banner, a Find result (long-press), a Collection badge, or a historic site in the Witch Trials library. A richer card for a historic place:

A historic place's card.

1	**★ Favourite**	Save the place to Favorites in Find (*"Saved to Favourites"*). Tap again to remove.
2	**🔊 Speak / ■ Stop**	Hear the full history from the start (Dr. K). Shown only on places with a recorded history. Stop leaves the card open.
3	×	Close the card (stops its reading).
4	**Name · category**	With the address and phone number when known. Tap the phone number to call.
5	**History**	The written story. **Tap any section to hear it.**
6	**Story sections**	Further chapters in gold headings. Tap one to hear just that part.

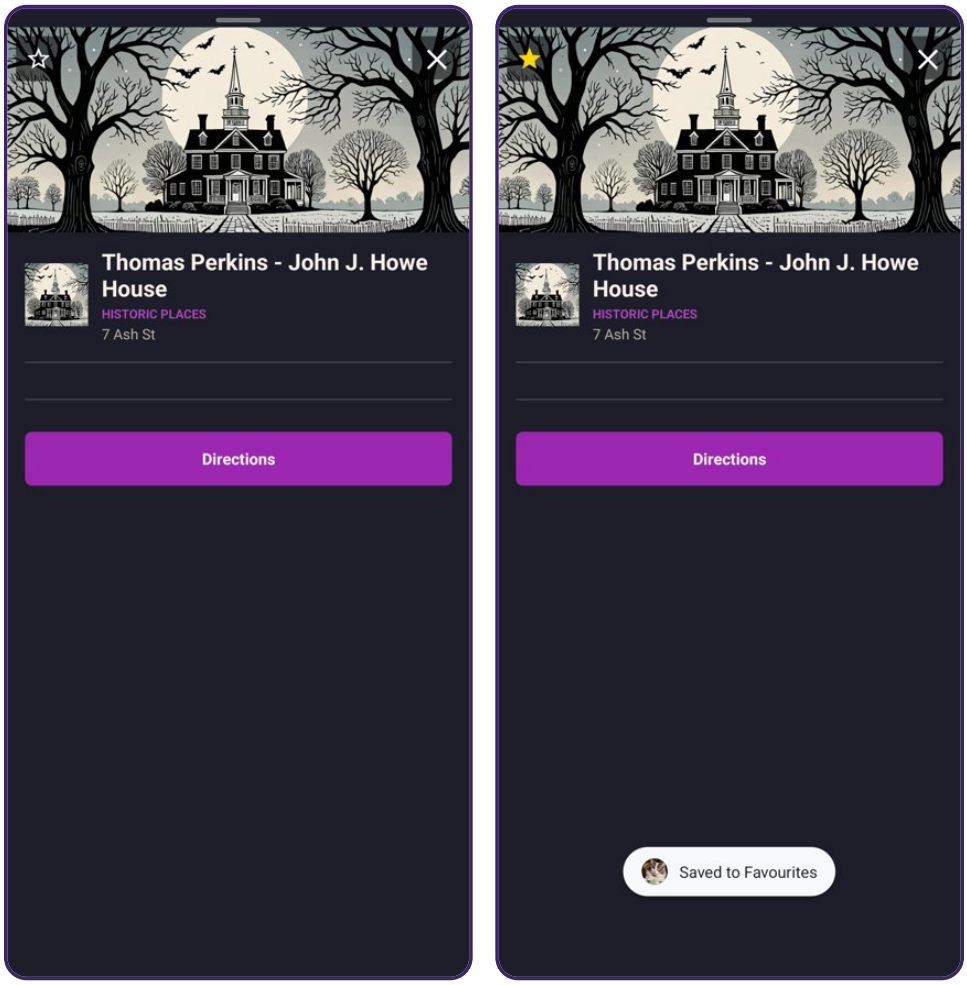

The picture at the top is a **gallery**: when a place has several photographs they cross-fade every few seconds.

The gallery changes photographs; while reading, the pill turns to ■ Stop.

Other parts of a card

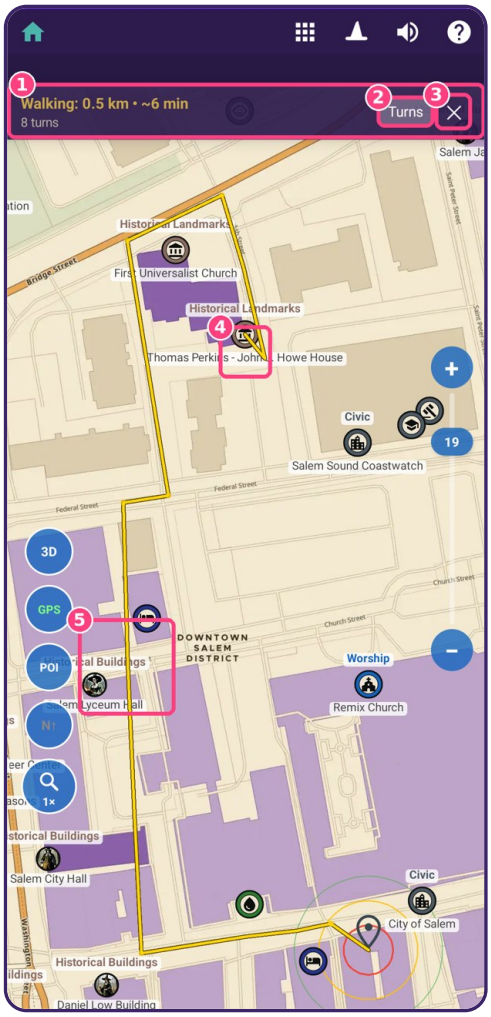

- **Directions** — draws a walking route from you to the place and closes the card (3.10).
- **Visit Website** — opens the place's website in your phone's browser (the guide itself never goes online).
- **Things You Can Do** — for some places: website, call, email, menu, reserve, order, opening hours.
- **Take a detour and walk there?** — appears during a tour on places that are not on the tour. It draws an orange route there, and a banner *"On detour to <place> · tap to manage"* lets you **Return to tour** (nearest point, or nearest marked place on the path) or **Stop tour, continue later**.
- Simple places show a shorter card — name, category, address and Directions.

A simple card, and saving it to Favourites.

Cards that open themselves. During a tour or a Simu-Walk, the card follows the narration — when the next place speaks, its card replaces the last one. A card *you* opened stays put until you have walked on a little.

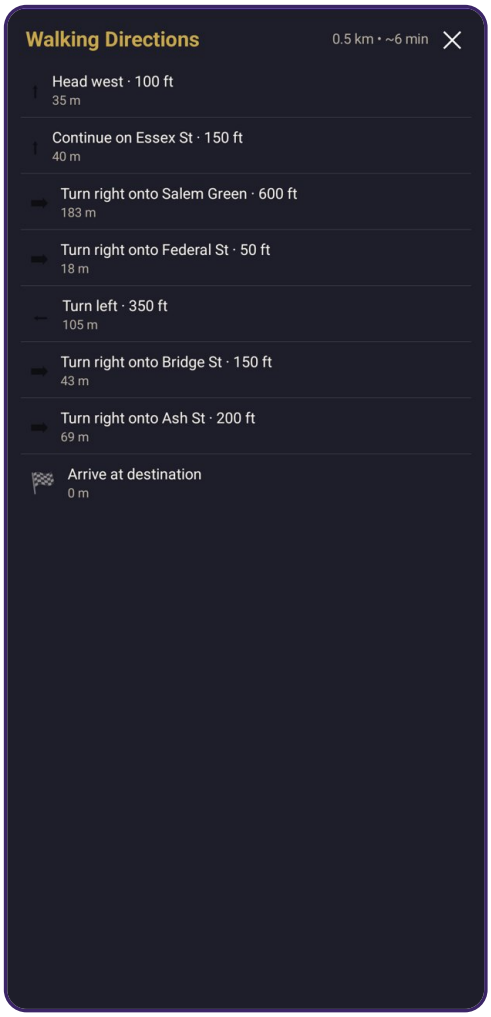

3.10 Walking directions

Walking directions to a place.

1	**Directions bar**	*"Walking: 0.5 km • ~6 min"* and the number of turns.
2	**Turns**	Opens the turn-by-turn list. Tap a turn to centre the map on it.
3	×	Clears the route.
4	**Destination**	Where the route ends.
5	**You**	The route starts at your position.

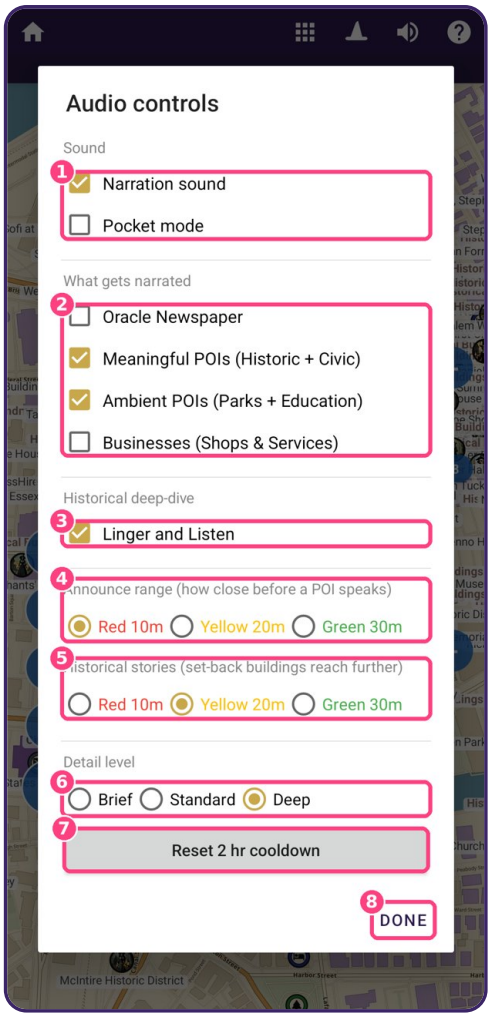

If you stray more than about 25 m from the line, the route redraws itself. You have arrived when you are within about 15 m.

The Walking Directions list.

3.11 Audio controls

Long-press the speaker button to open Audio controls. Changes take effect at once; tap **DONE** to close.

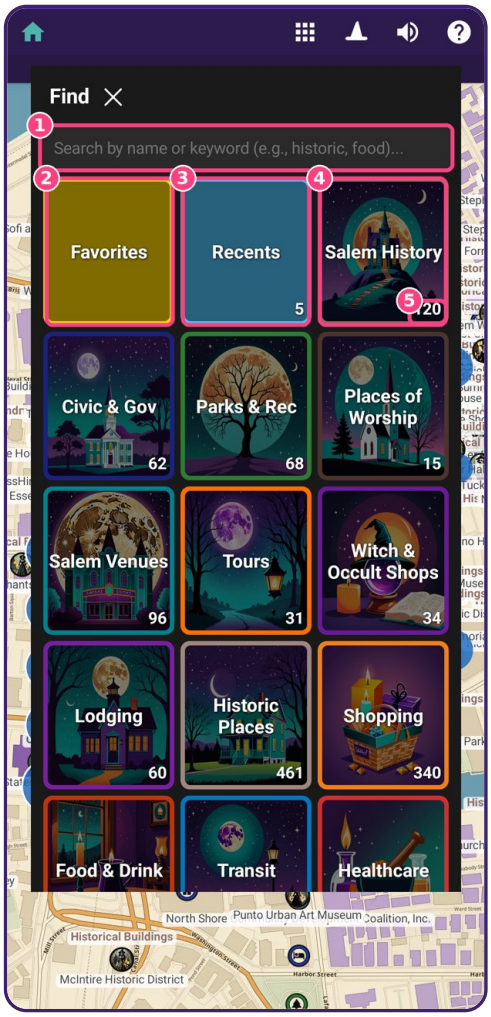

Audio controls, with the settings a new install starts with.

1	**Sound**	**Narration sound** — the master switch for every voice (on). **Pocket mode** — keep narrating with the screen off (off; 2.10, 4.7).
2	**What gets narrated**	**Oracle Newspaper** (off — and off again each time the app opens) · **Meaningful POIs (Historic + Civic)** (on) · **Ambient POIs (Parks + Education)** (on) · **Businesses (Shops & Services)** (off; the POI button also switches this).
3	**Linger and Listen**	A historical deep-dive option (on by default). In this edition of the app it has no audible effect.
4	**Announce range**	How close you must be before a place speaks: **Red 10m** (closest, the default), **Yellow 20m**, **Green 30m**. The rings around your position show these.
5	**Historical stories**	The same choice for places with a history — set-back buildings need a longer reach. Default **Yellow 20m**.
6	**Detail level**	**Brief** — names only. **Standard** — the name and the main story. **Deep** — everything, every section (default).
7	**Reset 2 hr cooldown**	Lets every place (and the Oracle) speak again now, instead of waiting two hours. Your Collection is not touched.
8	**DONE**	Close.

Ranges in practice. A place triggers a little beyond the number on the label — each place has a small margin of its own (about 10 m) — and you need to be inside for a few seconds, so a GPS jump does not set it off. Tapping a card's **Speak** always plays, whatever these settings say (except the master **Narration sound** switch).

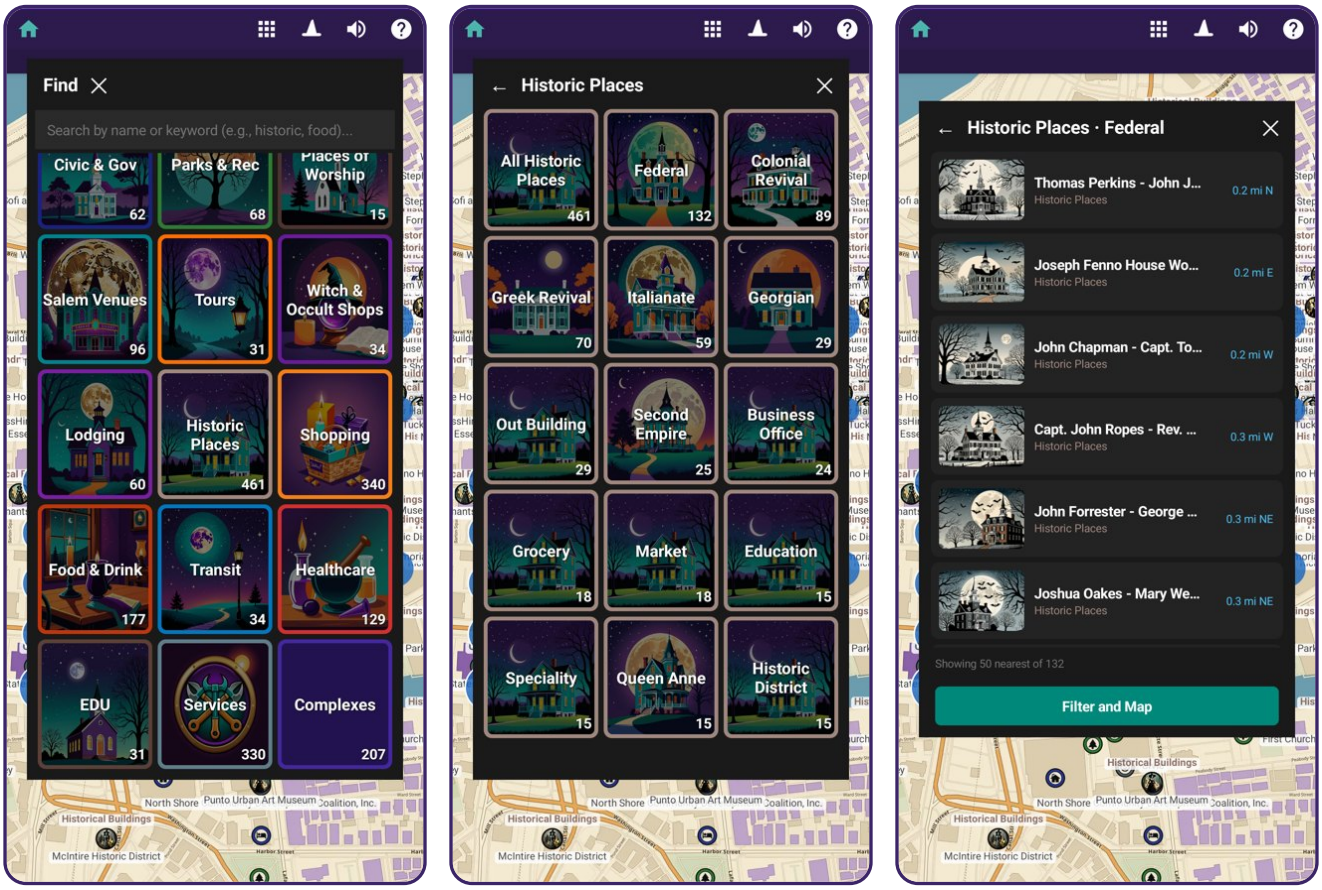

If your only audio output cannot play narration (for example a Bluetooth headset in call-only mode), **Narration sound** is greyed out with *“Narration unavailable on current audio output”*.

3.12 Find (detail)

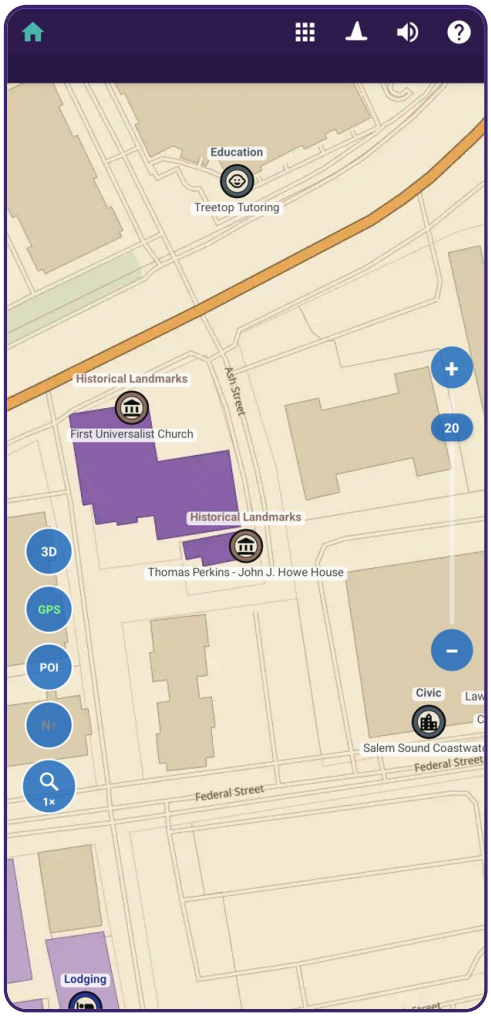

Find opens on its picture tiles.

1	**Search**	*“Search by name or keyword (e.g., historic, food)...”* — results appear after two letters.
2	**Favorites**	The places you starred on their cards.
3	**Recents**	Places you heard on a walk or opened from the map.
4	**Category tile**	Tap to open the category; **long-press** to show the whole category on the map.
5	**Count**	How many places the tile holds.

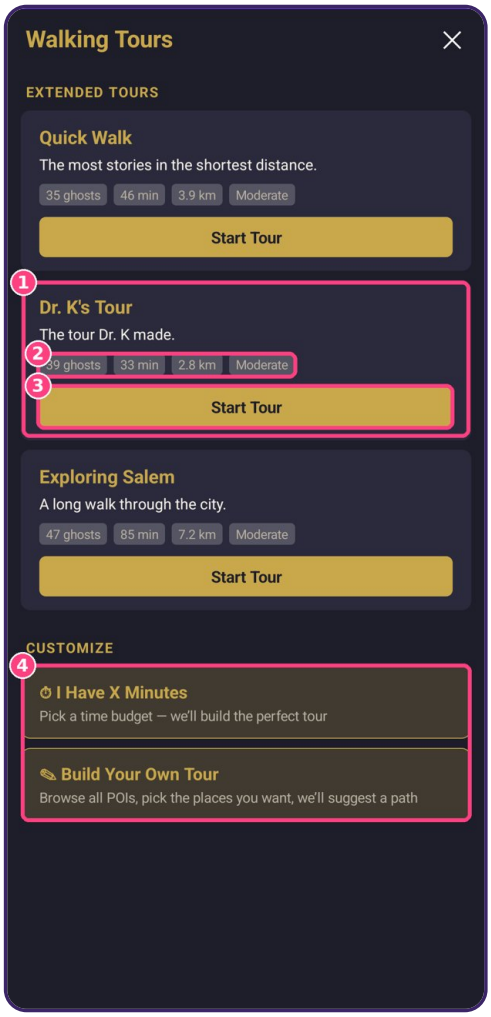

Scroll for more categories → a category's types (with an "All" tile first) → the nearest results, with distance and direction.

- **Tap a result** — Find closes and the map flies to the place.
- **Long-press a result** — opens its card.
- **Filter and Map** — closes Find and shows only those results on the map. The top line reads *"Showing N <category> — tap to clear"*. If a tour is running it pauses while you look, and resumes when you clear.
- Long lists offer *"Filter these by name…"*; the list shows the nearest fifty.
- The arrow ← steps back a level; × closes Find.

After tapping a result: the map flies to the place.

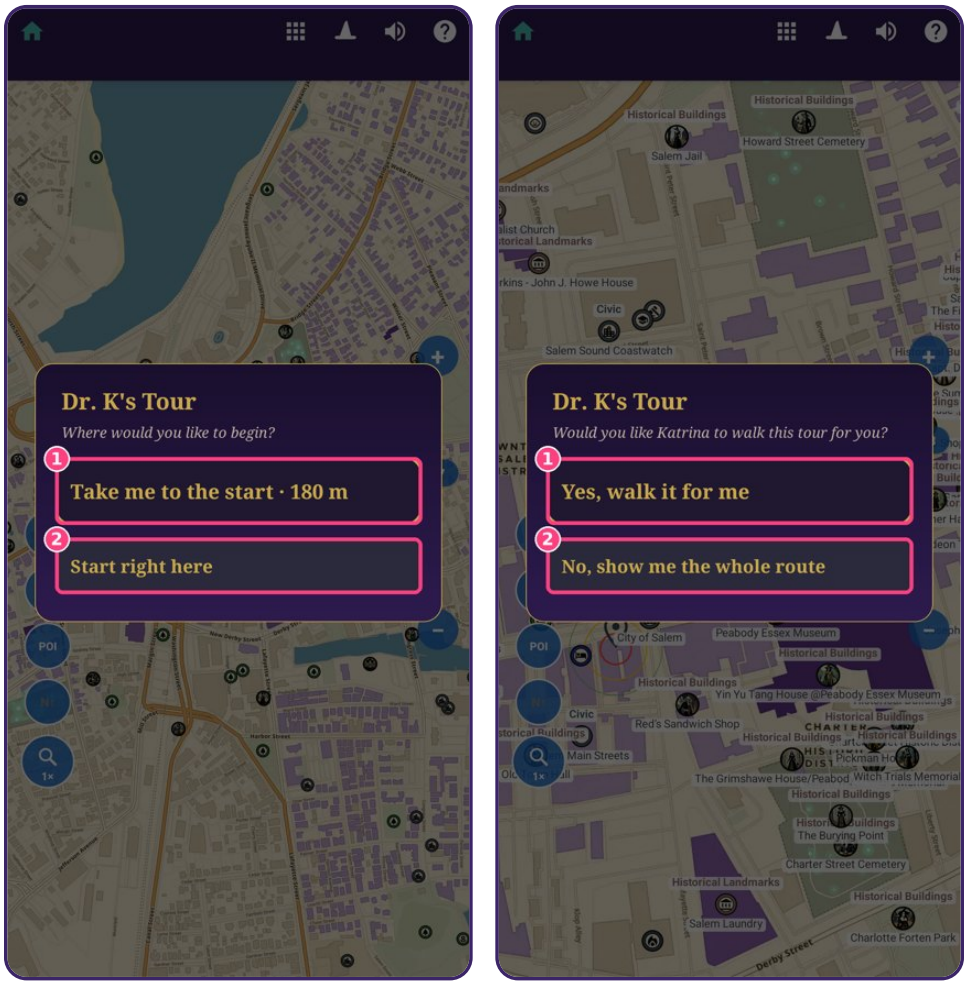

3.13 Walking Tours (detail)

The Walking Tours list.

1 **Tour card**	Name and a short description.
2 **Chips**	Ghosts to collect · time · distance · difficulty.
3 **Start Tour**	Begins the tour — the guide asks how to begin (below).
4 **Customize**	⏱ **I Have X Minutes** — *"Pick a time budget — we'll build the perfect tour"*. ✎ **Build Your Own Tour** — *"Browse all POIs, pick the places you want, we'll suggest a path"*.

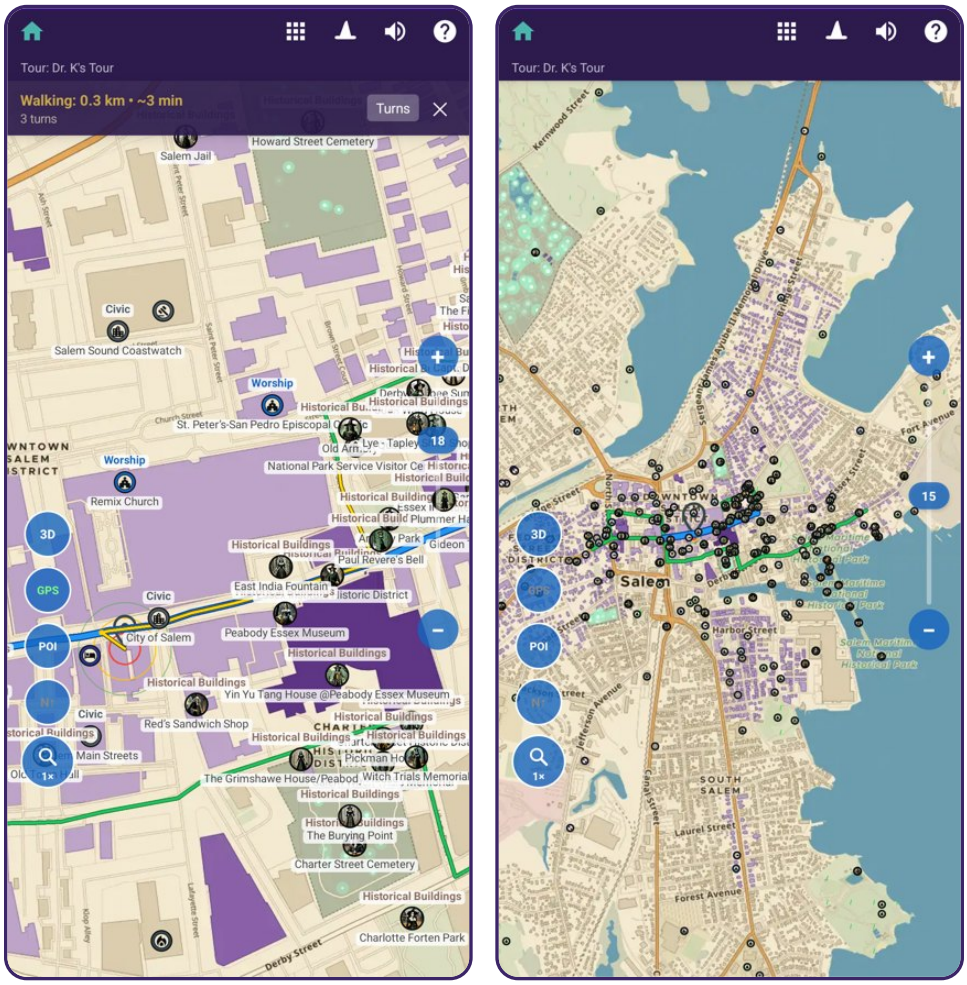

How to begin

Left: in Salem with GPS on. Right: away from Salem (or GPS off).

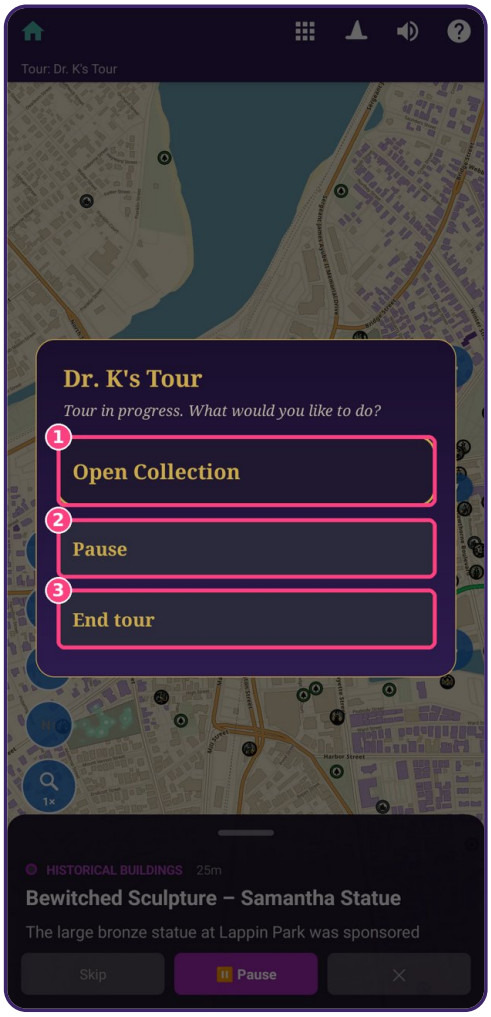

Choice	What happens
Take me to the start · N m	Walking directions to the tour's first point are drawn; the tour starts.
Start right here	You are already near the route; the tour starts from where you stand.
Start at the closest point · N m	Offered instead of "right here" when the route is further than about 50 m away.
Yes, walk it for me	Starts the tour *and* a Simu-Walk from the first point (2.3).
No, show me the whole route	Starts the tour and fits the whole route on the screen.

Close the question without choosing and nothing starts.

"Take me to the start" draws directions; "show me the whole route" fits the route on screen.

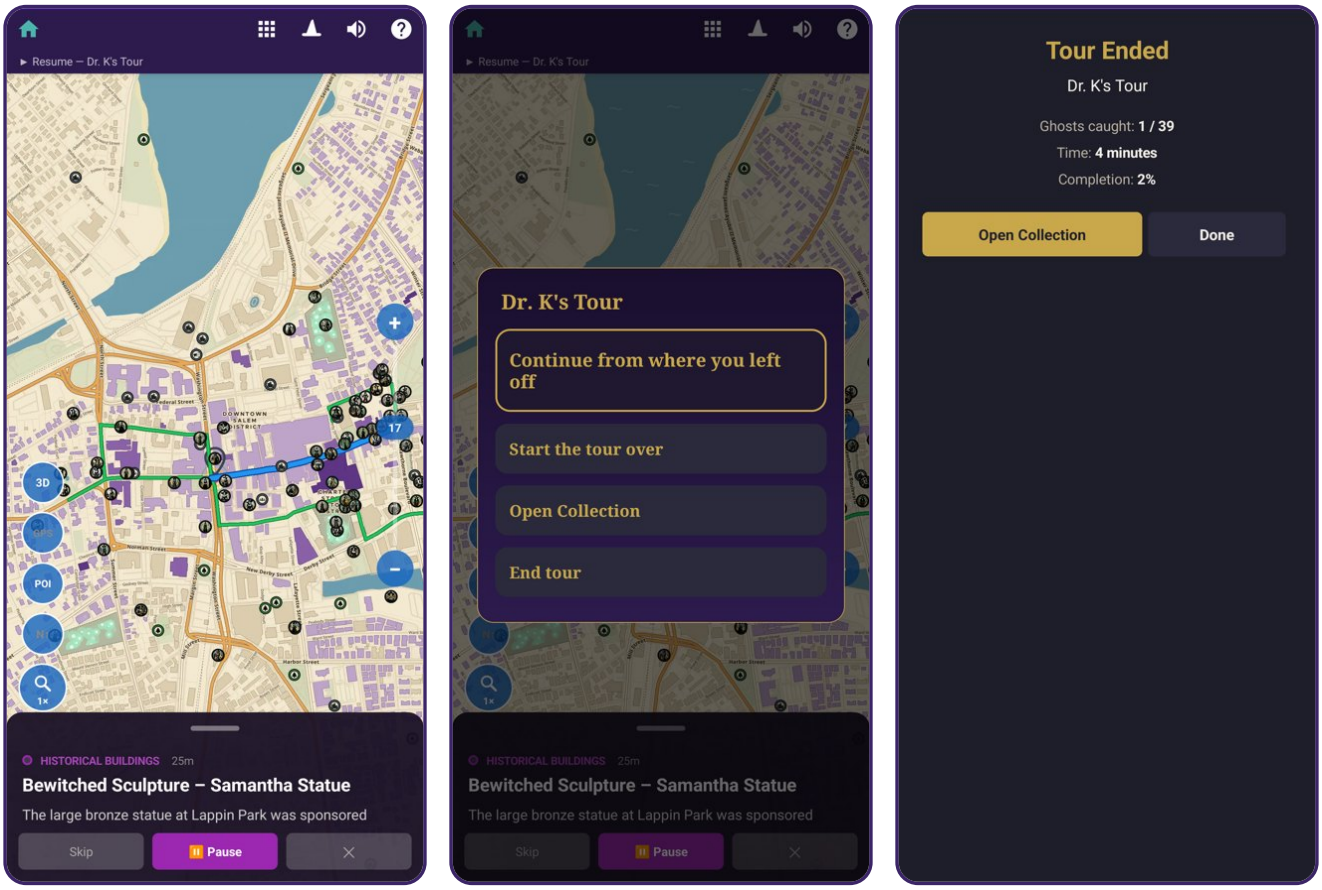

While a tour runs

Tap Tours in the menu grid while a tour runs.

1	**Open Collection**	This tour's ghosts — caught and still to find.
2	**Pause**	Pauses the tour. The top line becomes *"▶ Resume — <tour>"* — tap it to carry on. (Shows **Resume** when paused.)
3	**End tour**	Ends the tour and shows the summary.

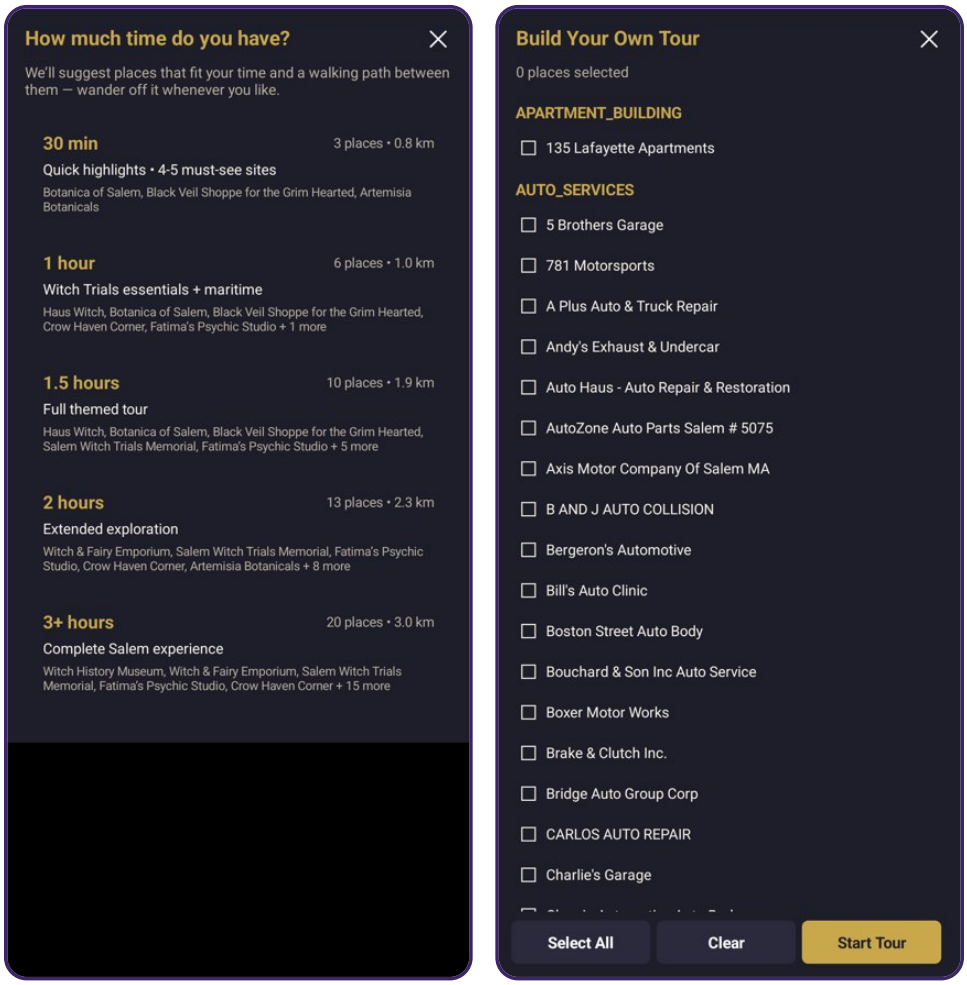

After a pause the menu offers **Continue from where you left off**, **Start the tour over**, **Open Collection** and **End tour**.

Paused ("▶ Resume — Dr. K's Tour") → the paused-tour menu → the Tour Ended summary.

The summary shows **Tour Complete!** (every ghost heard) or **Tour Ended**, with **Ghosts caught**, **Time** and **Completion**, and buttons **Open Collection** and **Done**.

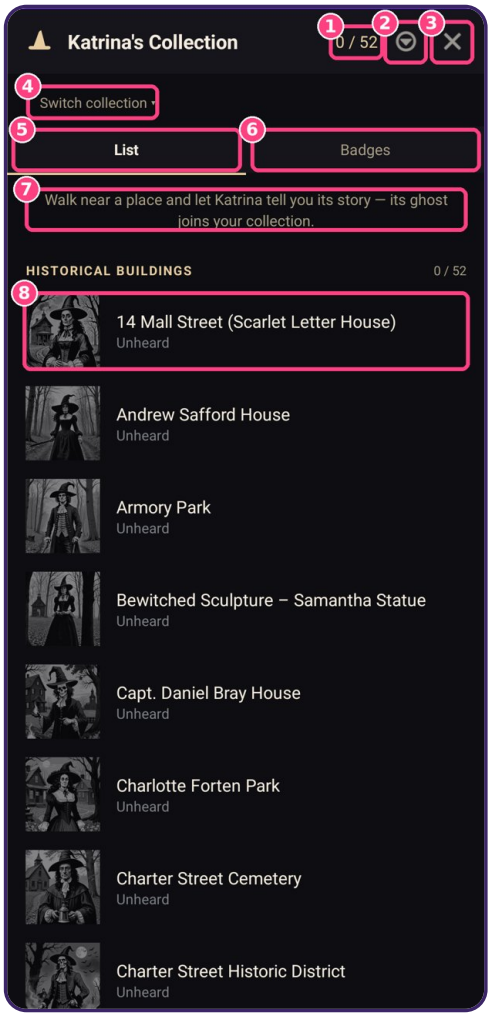

I Have X Minutes and Build Your Own Tour

Pick a time budget, or tick the places you want and tap Start Tour.

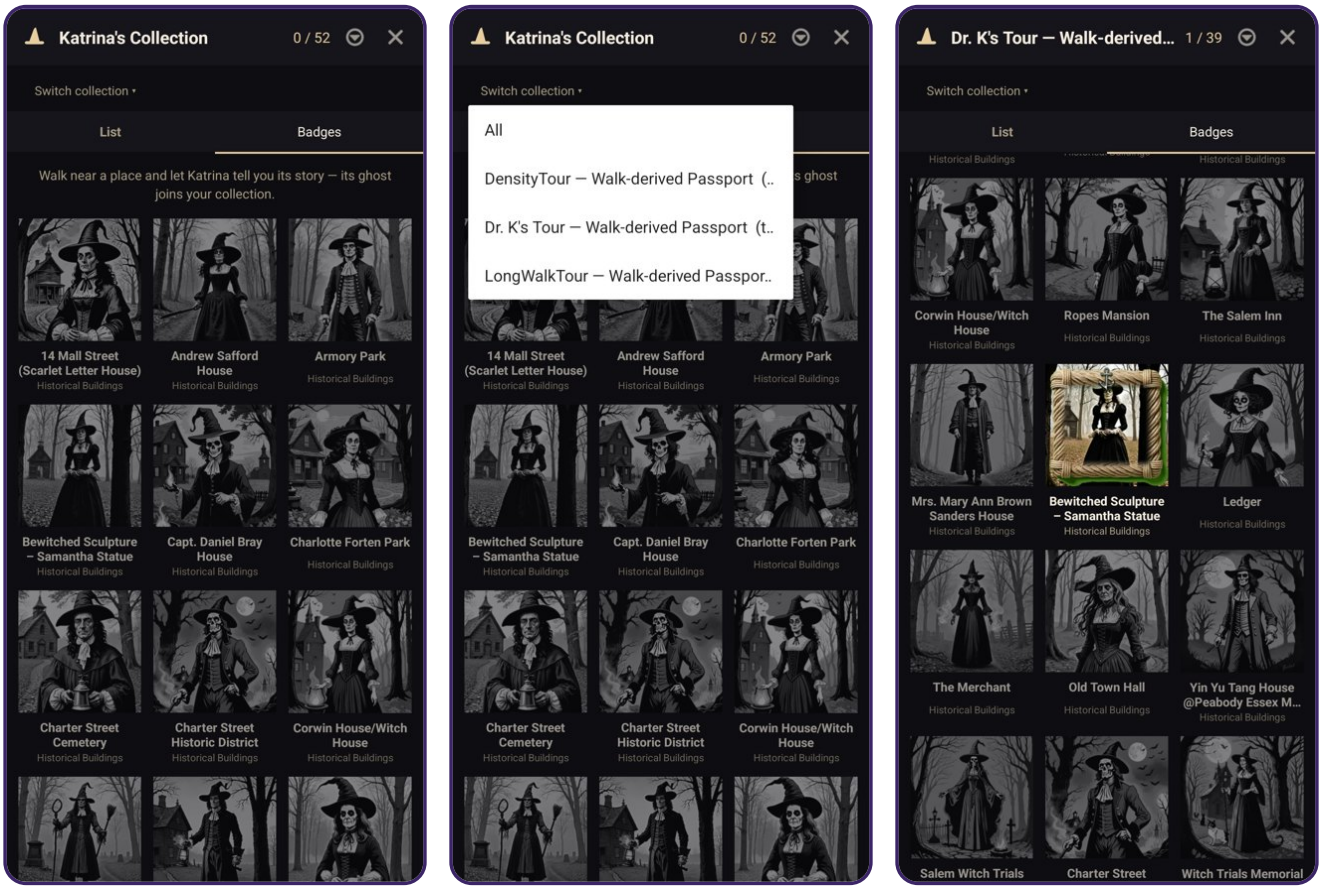

- **I Have X Minutes** — choose 30 min, 1 hour, 1.5 hours, 2 hours or 3+ hours. Each option lists its places and distance. *“Wander off it whenever you like.”*
- **Build Your Own Tour** — tick places (grouped by category), then **Start Tour**. **Select All** and **Clear** help. The summary line shows places, distance and minutes.

3.14 Katrina's Collection (detail)

Katrina's Collection — the List tab.

1	**Counter**	Ghosts caught / total in this collection.
2	**⋮ Options**	**Reset collection** (asks first — *"This clears all the places you visited so you can visit and hear them again!"*; cannot be undone) and, during a tour, **End tour**.
3	×	Close.
4	**Switch collection ▾**	All, or one tour's collection.
5	**List**	Every ghost by category, marked *"Heard N×"* or *"Unheard"*.
6	**Badges**	The ghost portraits as a gallery.
7	**Hint**	Shown until your first catch.
8	**A ghost**	Tap to open the place's card.

Badges · Switch collection · a caught ghost in colour and frame among the grey ones still to find.

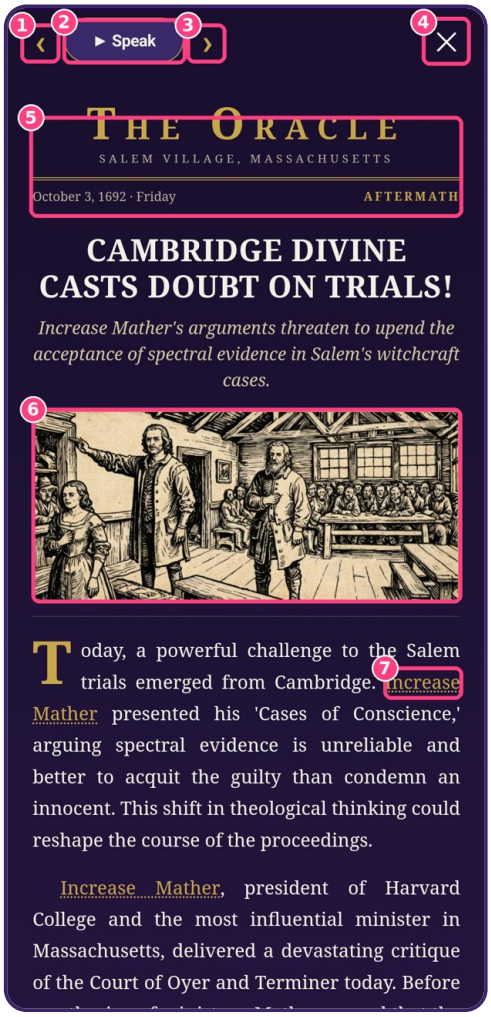

3.15 The Salem Witch Trials (detail)

The Witch Trials library.

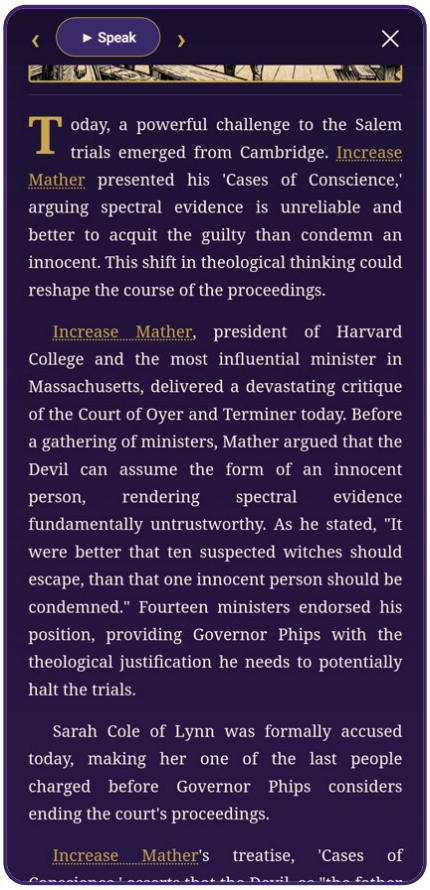

1	**Today in 1692**	The Oracle dispatch for today's date (or *"Near this day in 1692"* within three days). Not shown when nothing is close.
2	**Read ▶**	Opens that day's newspaper.
3	**History**	Sixteen chronological chapters.
4	**The Oracle Newspaper**	Every dispatch, by date and crisis phase.
5	**The People of Salem 1692**	The principal figures, with portraits and biographies.
6	**Historic Sites of Salem**	Buildings and sites by era; each opens its place card.

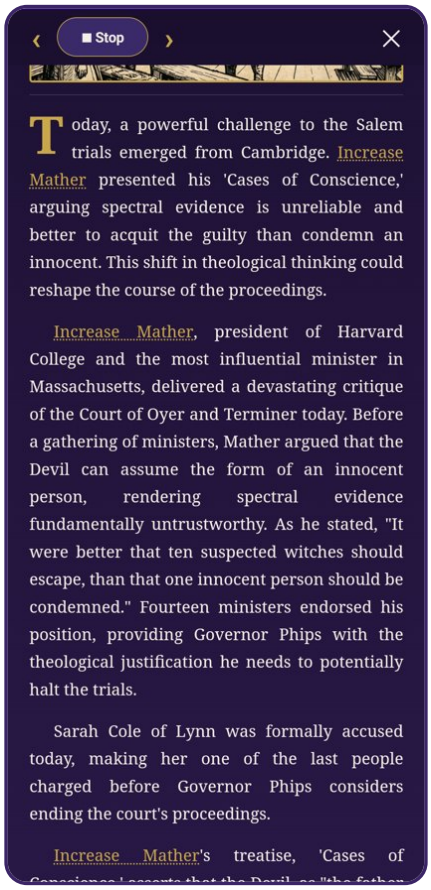

The newspaper page

A page of The Oracle.

1	‹	The previous (earlier) dispatch.
2	**▶ Speak / ■ Stop**	Dean reads the dispatch — and carries on to the next one, and the next, even after you close the page, until you tap Stop or another story starts.
3	›	The next (later) dispatch.
4	×	Close.
5	**Masthead**	The date, weekday and phase of the crisis, the headline and summary.
6	**Woodcut**	The day's illustration.
7	**Gold names**	Links — tap to open that person's biography.

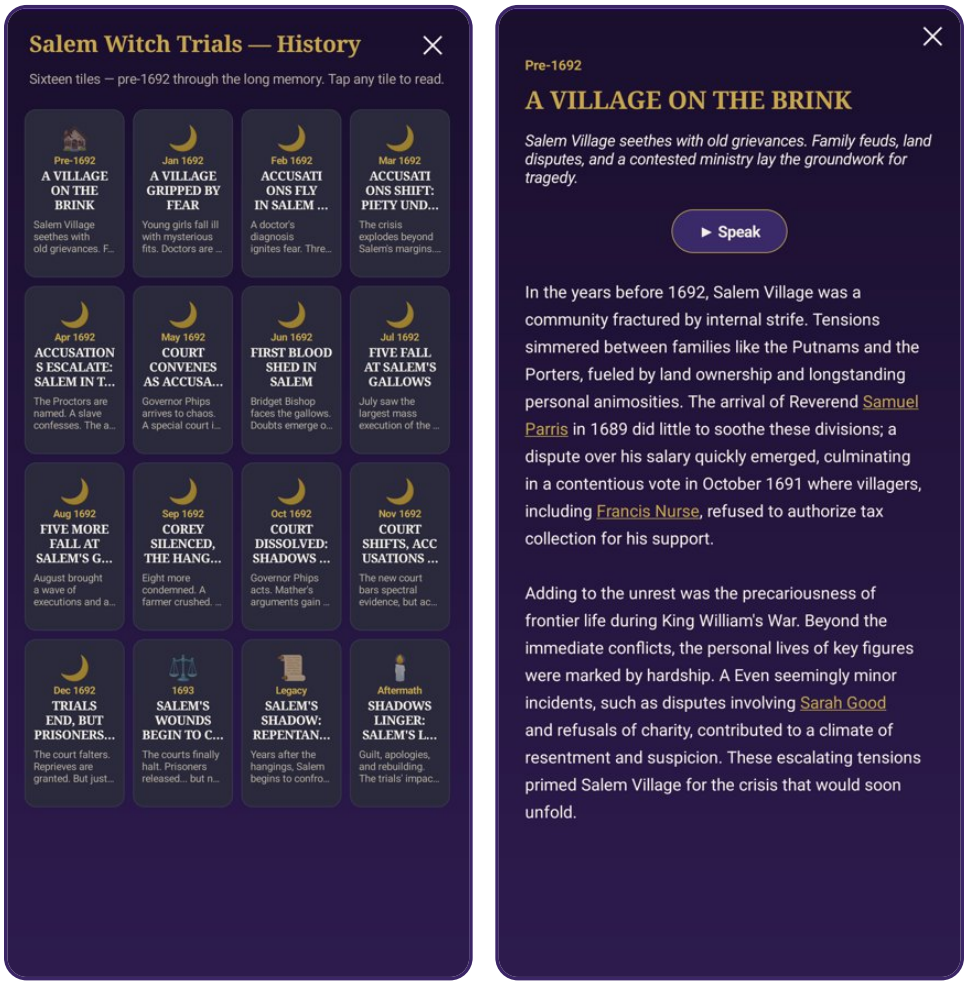

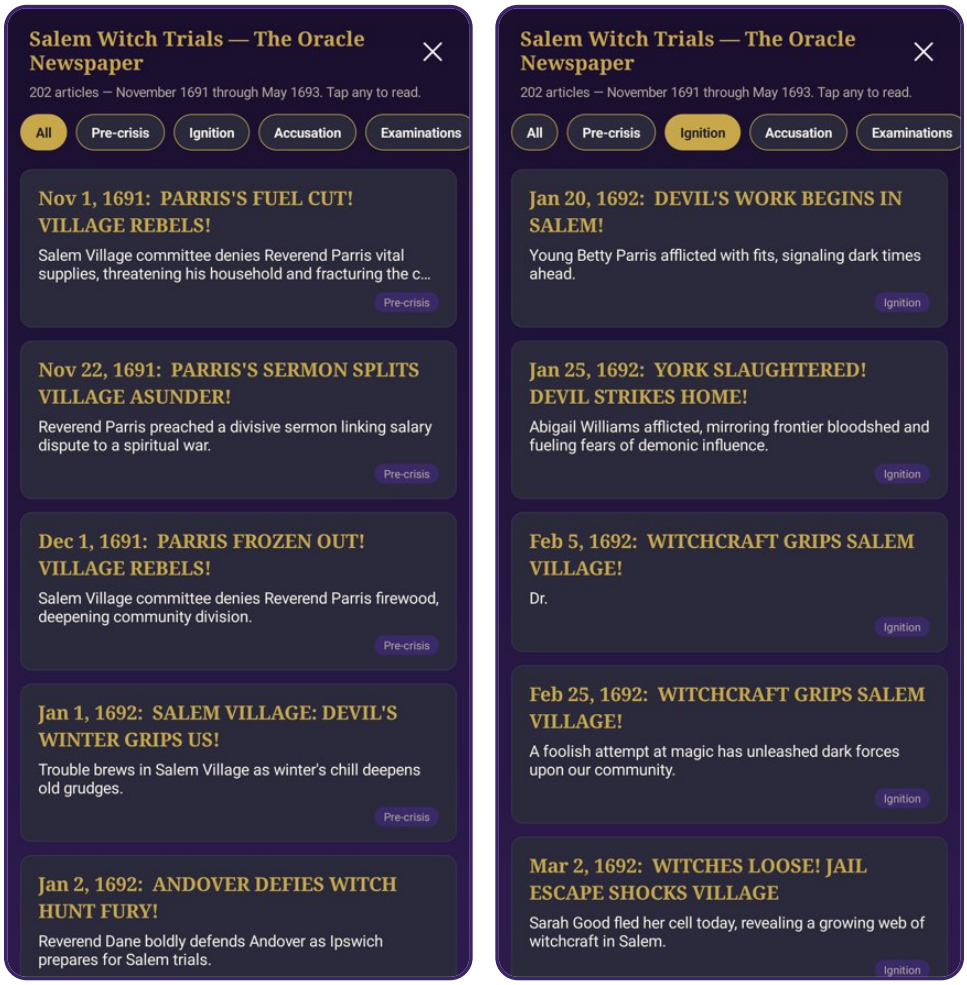

Reading on; ■ Stop while Dean reads; tapping "Increase Mather" opens his biography.

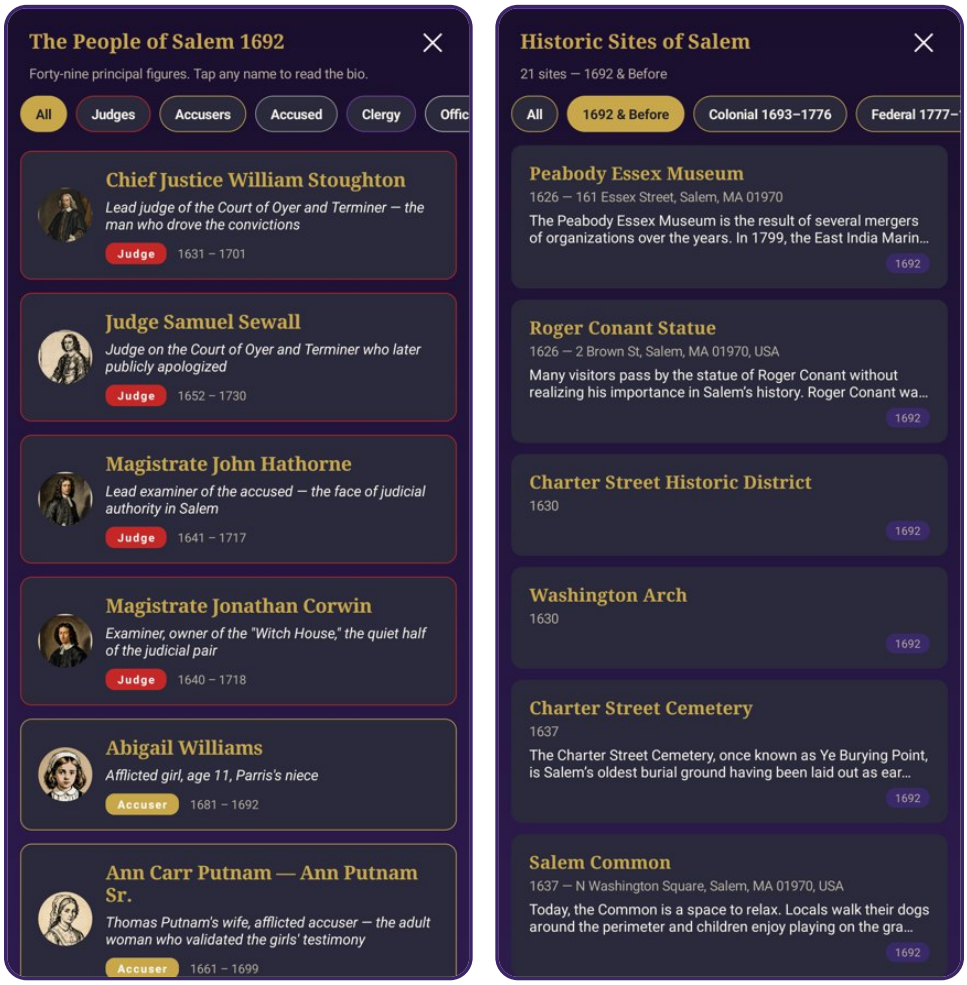

History, the Oracle list, People and Sites

The sixteen History tiles, and a chapter with its ▶ Speak button. When Speak finishes a chapter it moves on to the next.

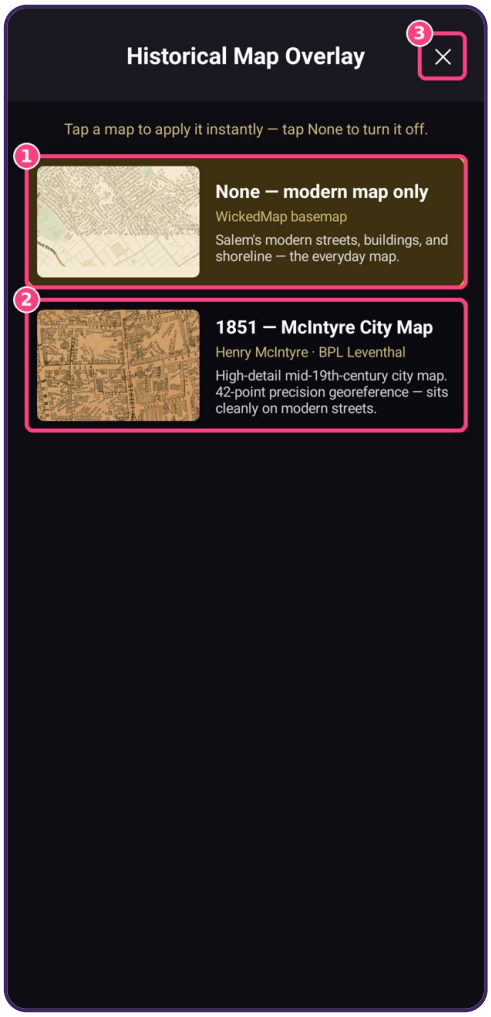

The Oracle list — tap a phase chip (All · Pre-crisis · Ignition · Accusation · Examinations · Court of O&T · Mass trials · Aftermath) to narrow it.

People, filtered by role (Judges · Accusers · Accused · Clergy · Officials · Others); Historic Sites, filtered by era (1692 & Before · Colonial 1693–1776 · Federal 1777–1850).

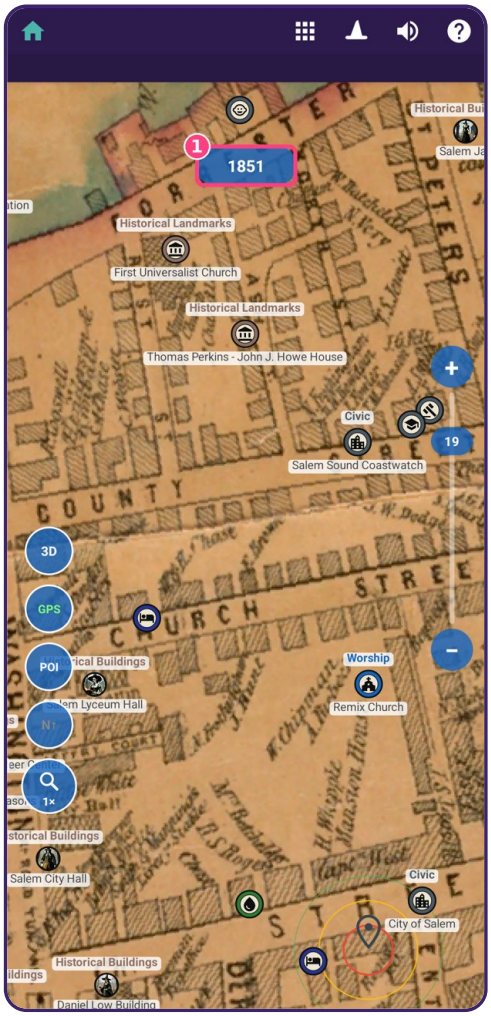

3.16 Maps

The map picker.

1	**None — modern map only**	Salem's modern streets, buildings and shoreline — the everyday map.
2	**1851 — McIntyre City Map**	Henry McIntyre's 1851 city map (Boston Public Library, Leventhal Map Center), fitted to modern streets.
3	×	Close.

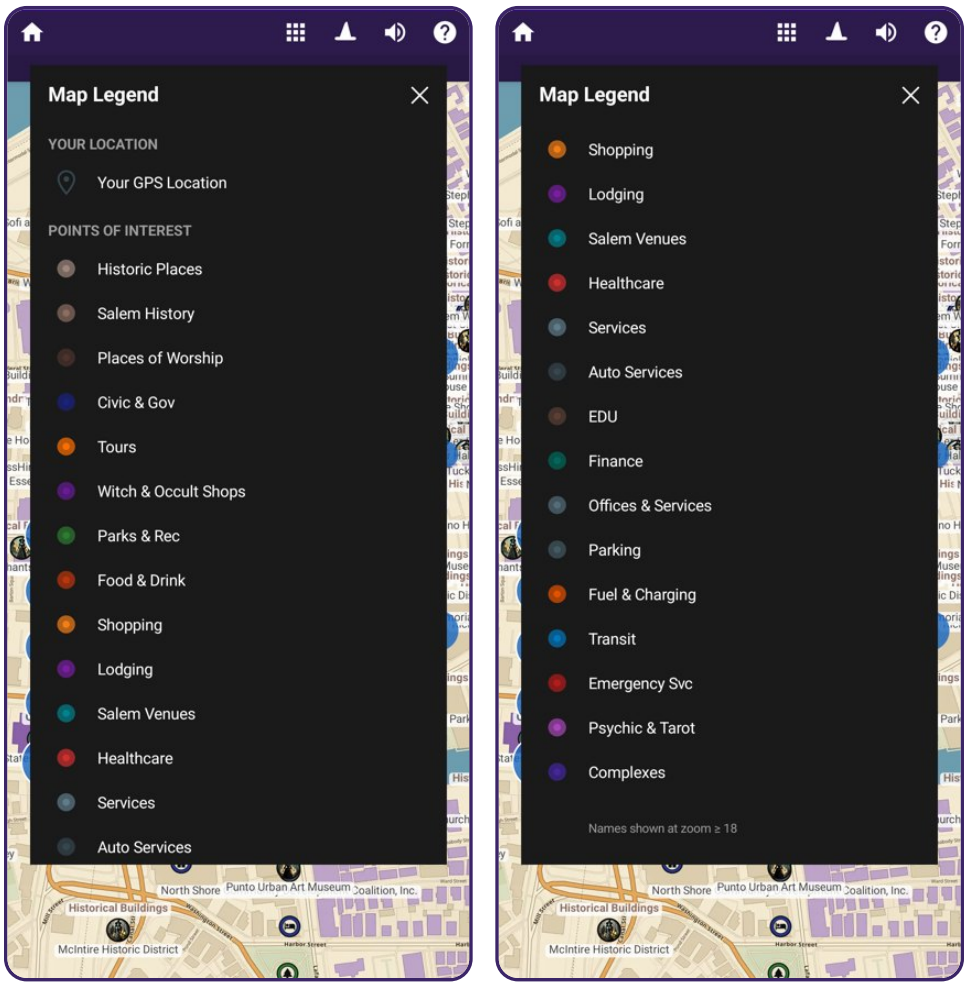

“Tap a map to apply it instantly — tap None to turn it off.” Your choice is remembered next time.

The 1851 map.

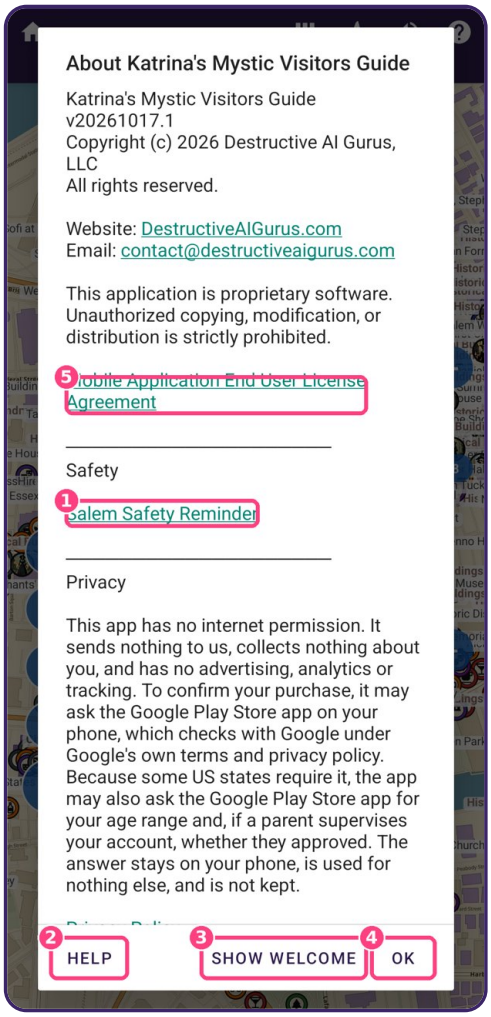

1	**1851 tag**	Shows which map you are on. Tap to reopen the picker.

3.17 Map Legend

The Map Legend: your location, and the colour of every category of place. "Names shown at zoom ≥ 18".

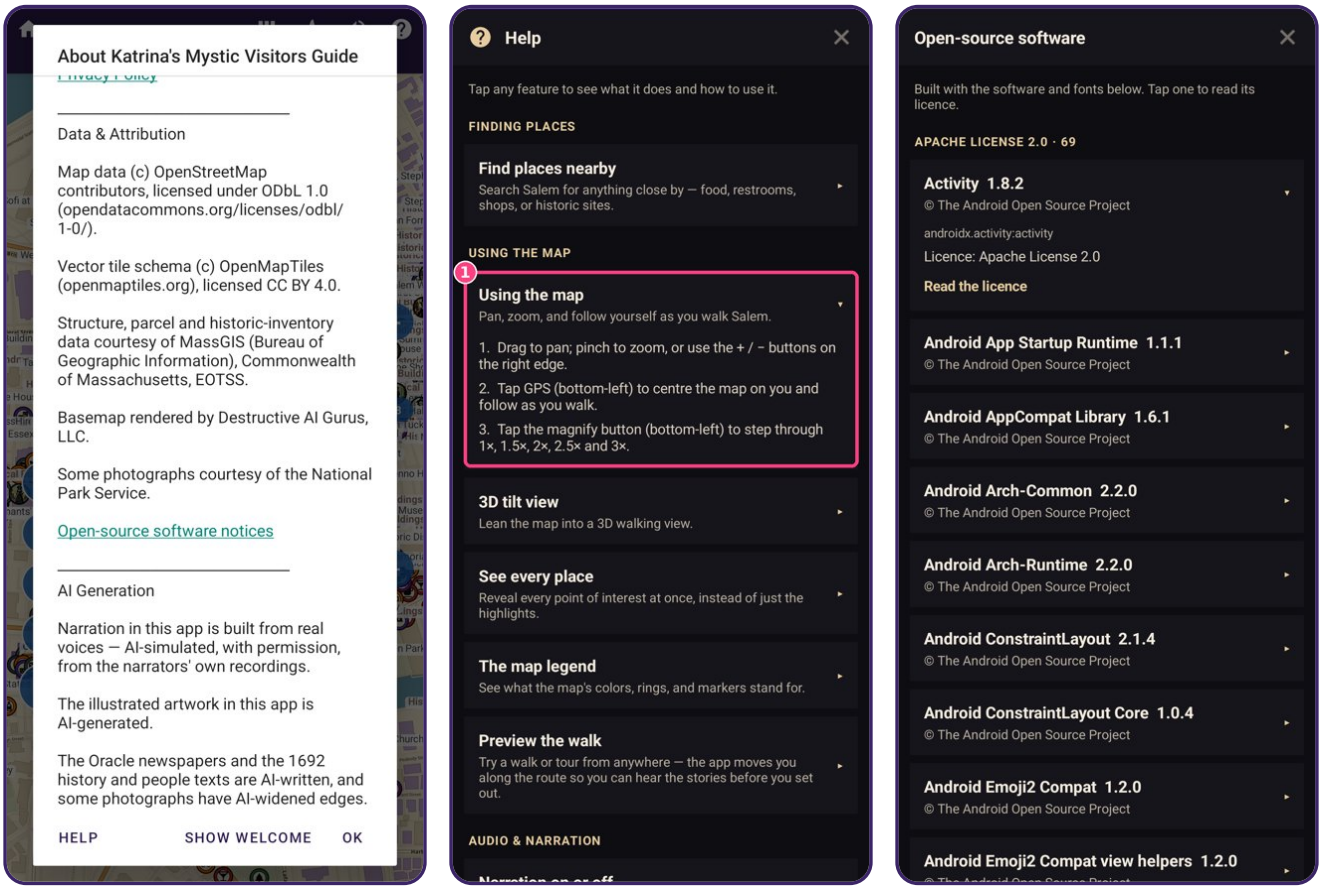

3.18 About, Help and notices

The About screen.

1	**Salem Safety Reminder**	Read the safety reminder again.
2	**HELP**	The in-app Help.
3	**SHOW WELCOME**	Brings back the welcome screen.
4	**OK**	Close.
5	**Mobile Application End User License Agreement**	The app's licence — tap to read the full text.

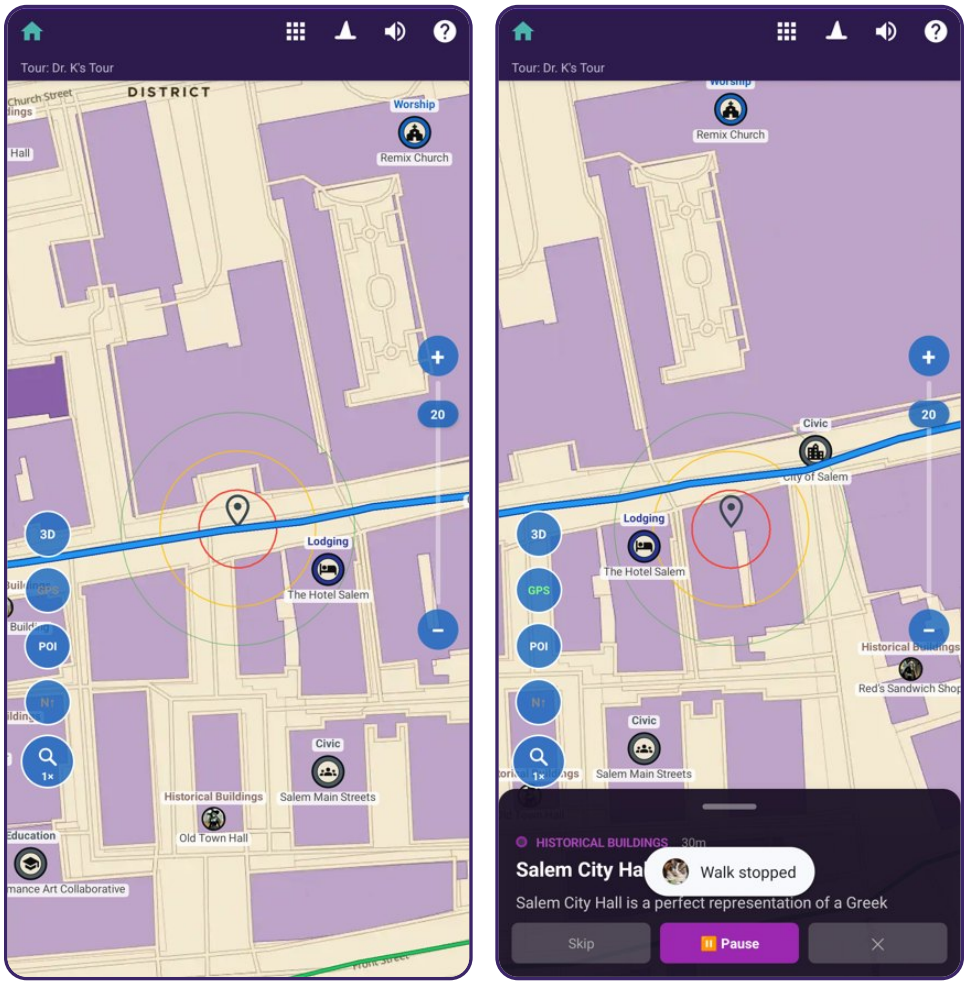

Scroll for Privacy (its **Privacy Policy** line opens the policy in your phone's browser), Data & Attribution, **Open-source software notices**, and AI Generation.

About (scrolled) · Help with an entry opened · Open-source software notices with a licence row opened.

3.19 Messages you may see

Message	Meaning
“Please reinstall from Google Play”	This copy was not installed by Google Play, or could not be checked. **Open Google Play** takes you to the store page; uninstall and install again from there.
“You're about N miles from Salem”	You opened the guide away from Salem. Location pauses until you arrive.
“Welcome to Salem — location is back on.”	You have arrived; following resumes.
“Manual mode — searching POIs...”	You long-pressed the map; that spot is now your position.
“Walking to '<route>'” / *“Starting at the tour's first stop”*	A Simu-Walk is starting.
“Walk stopped” / *“Walk simulation complete”*	The Simu-Walk ended.
“'<tour>' doesn't have a walking route yet”	That tour cannot be simulated.
“Cooldown reset — N location(s) may announce again”	You pressed Reset 2 hr cooldown.
“Nothing to replay yet”	You tapped the speaker before anything had played.
“Muted”	You tapped the speaker while something was playing.
“Narration unavailable on current audio output”	The connected audio device cannot play narration.

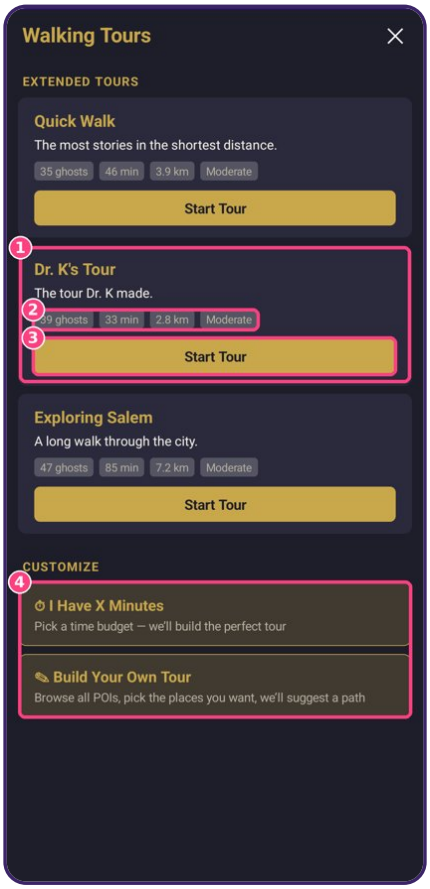

Left: a Simu-Walk begins at street level. Right: "Walk stopped".

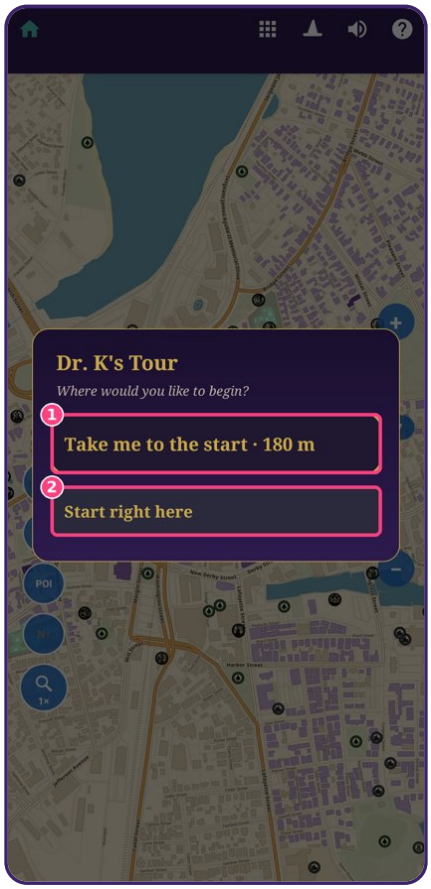

PART 4 — STEP-BY-STEP DEMOS

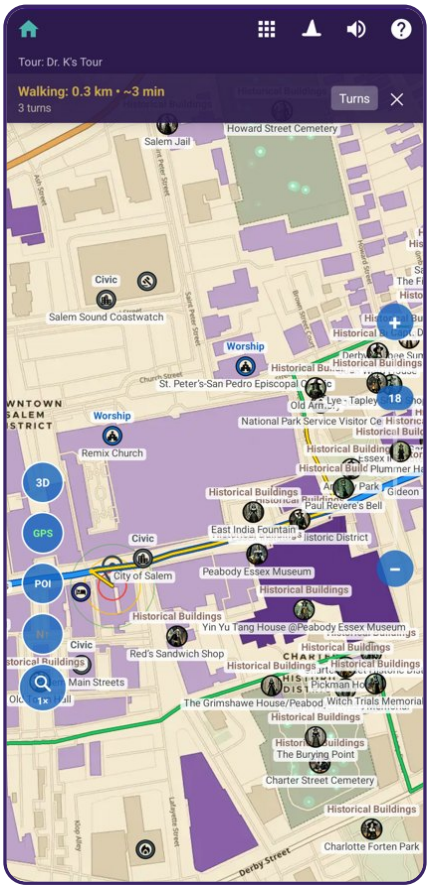

Follow along — each demo shows what to tap and what you will see and hear.

4.1 Take a guided tour on foot

1. Stand in downtown Salem with the app open and the **GPS** button green.
2. Tap the **nine-dot** menu, then **Tours**.
3. Pick a tour — check its time and distance chips — and tap **Start Tour**.
4. Choose **Take me to the start** (directions appear) or **Start right here**.
5. Follow the green line. The leg you are on turns blue. The top line reads *"Tour: <name>"*.
6. At each place the banner slides up and the story plays. Tap the banner's handle for the full card.
7. Need a break? Menu → **Tours** → **Pause**. Tap *"▶ Resume"* on the top line to carry on.
8. Finish with Menu → **Tours** → **End tour** — or hear every ghost and it ends itself.

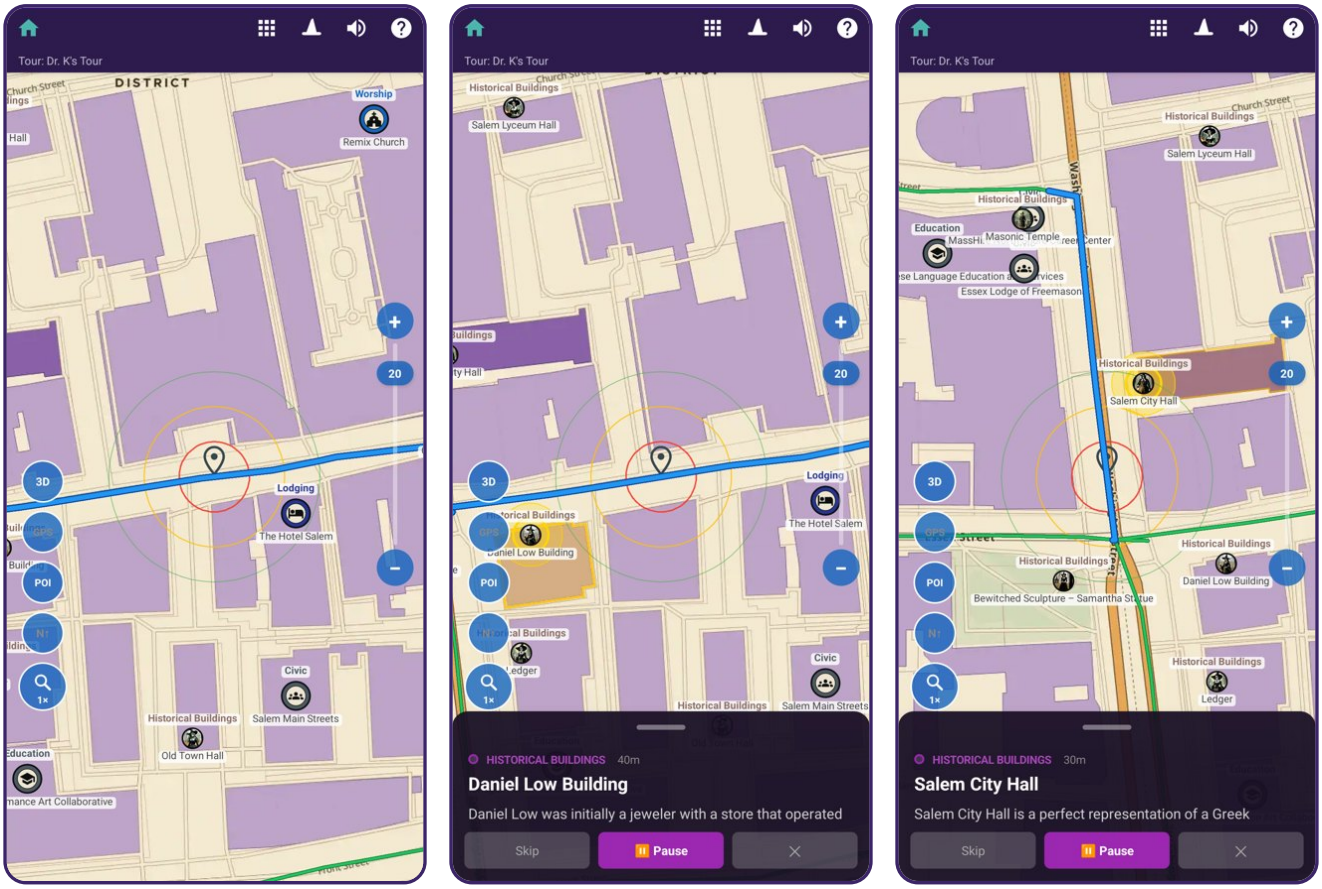

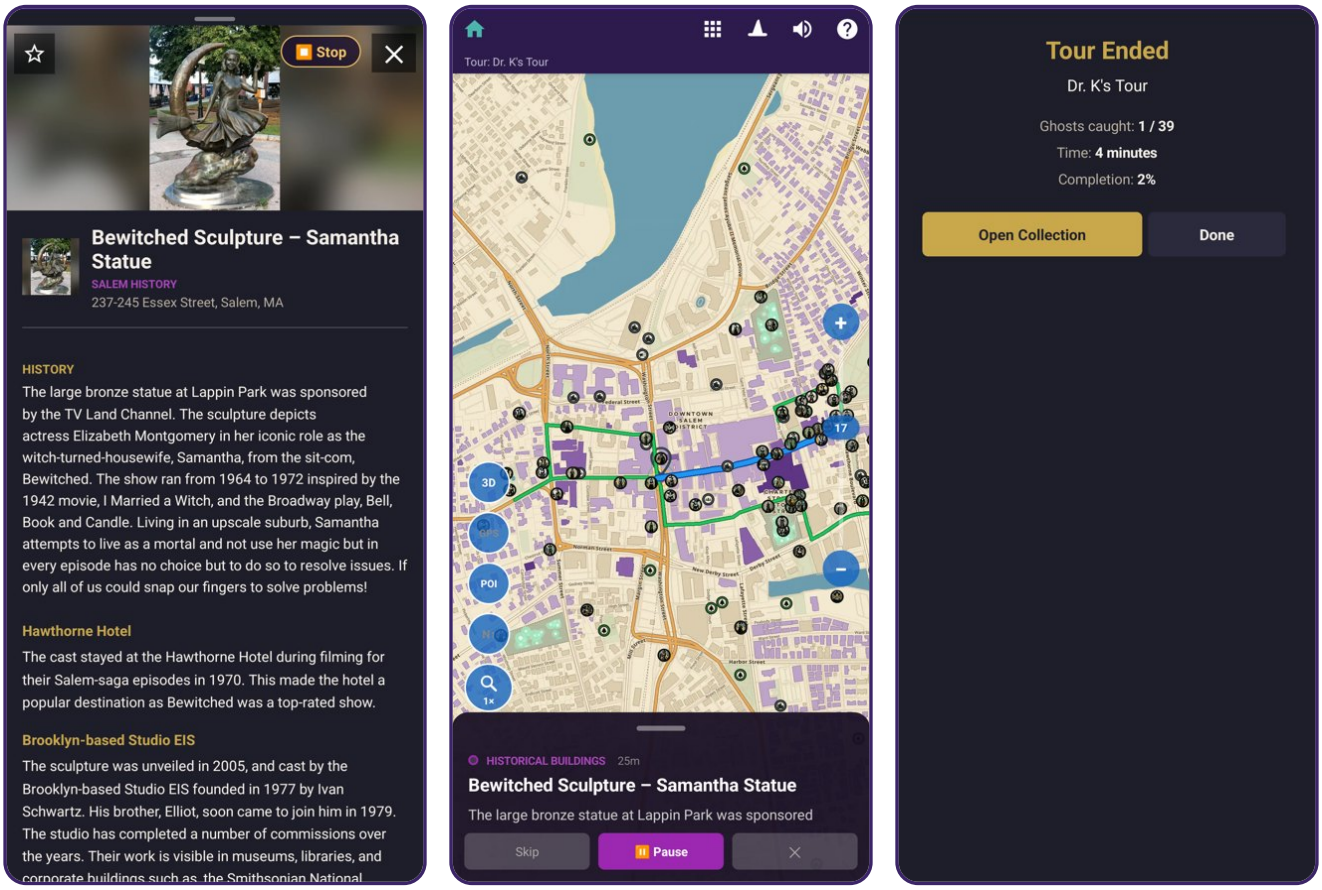

Tours → Start Tour → "Take me to the start".

4.2 Preview a tour from your sofa (Simu-Walk)

1. Open the menu grid and tap **Simu-Walk**.
2. The Walking Tours list opens. Tap **Start Tour** on the tour you want.
3. The map drops to street level and the walker sets off along the route at walking pace.
4. When the walker reaches a place, it **pauses** while the story plays — the place's outline glows gold.
5. The card follows along: each new story opens its own card. Close it with × any time; the walk continues.
6. Zoom out to watch the walker's progress along the green route.
7. Stop with **Simu-Walk** again (it is gold while running), a tap on the map, or **End tour**.

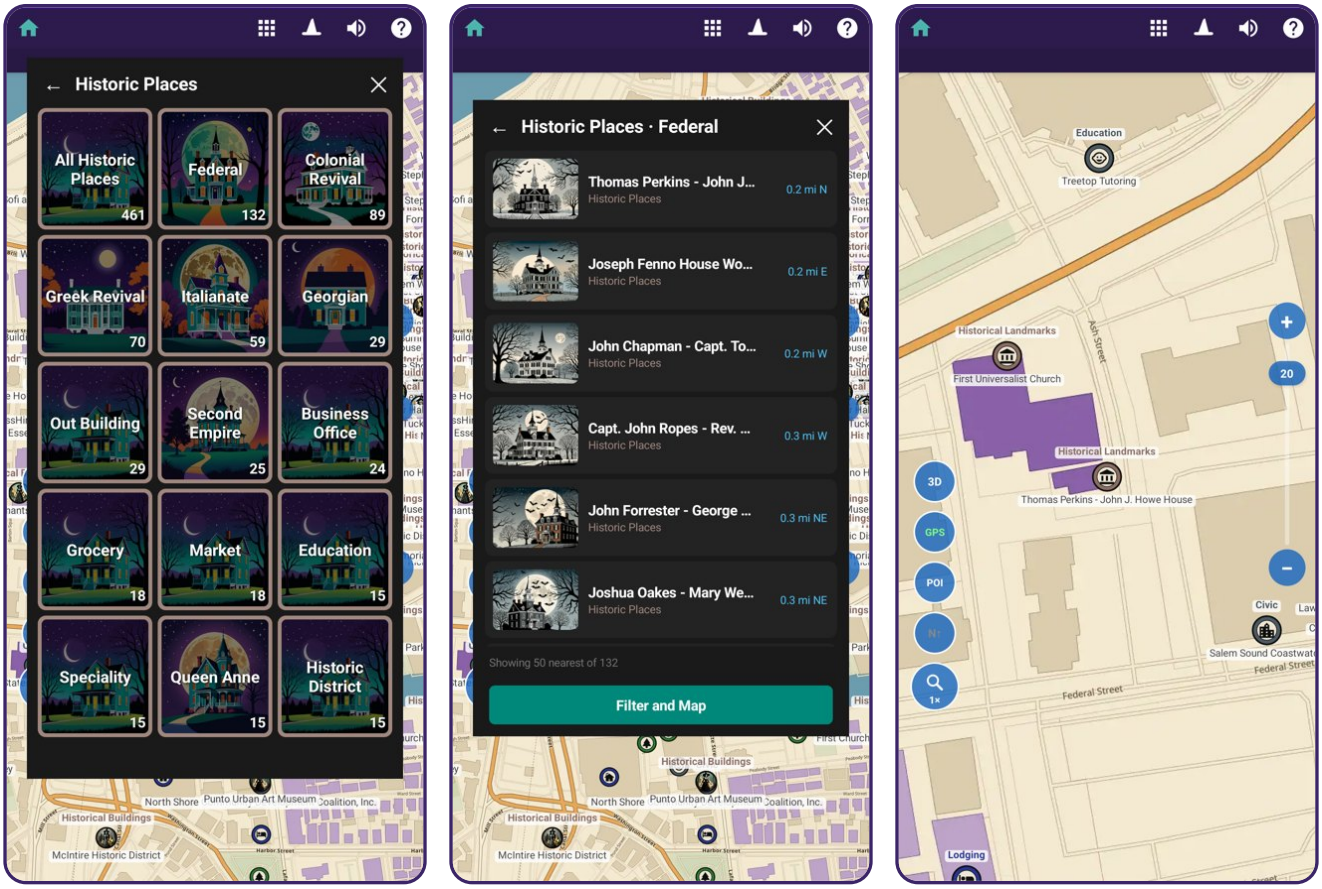

The walk begins → a historic place speaks and the walker waits → the next place's outline glows while its story plays.

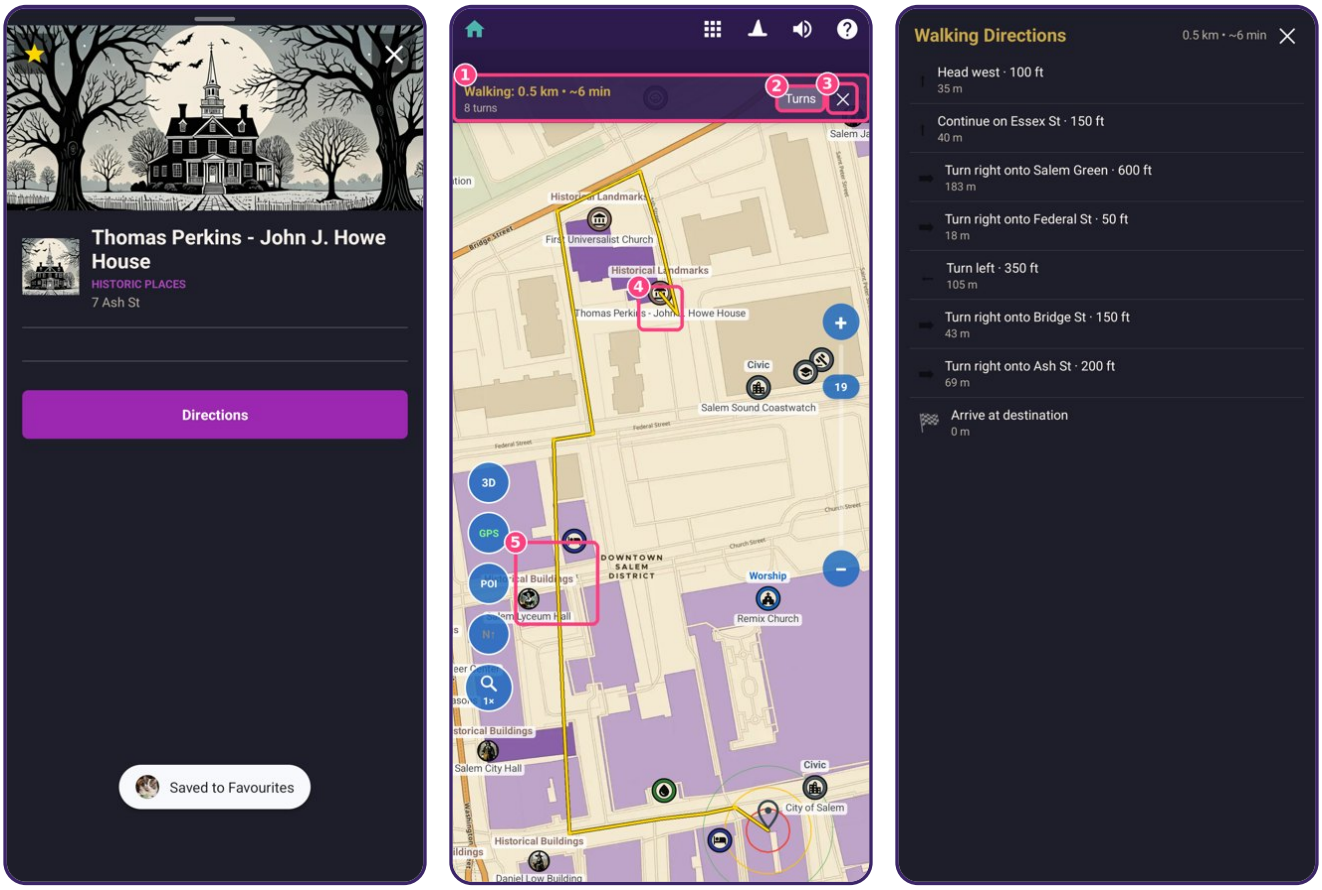

A card opened during the walk → zoomed out on the route → the summary after End tour.

4.3 Find a place and walk there

1. Menu → **Find**.
2. Tap a category tile — for example **Historic Places** — then a type, such as **Federal**. (Or type a name in the search box.)
3. The nearest results are listed with distance and direction. Tap one: the map flies there.
4. Tap the place on the map to open its card. Tap the ★ to save it to Favorites.
5. Tap **Directions**. A route appears with *“Walking: … km • ~… min”*.
6. Tap **Turns** for the turn list; tap × on the bar to clear the route when you arrive.

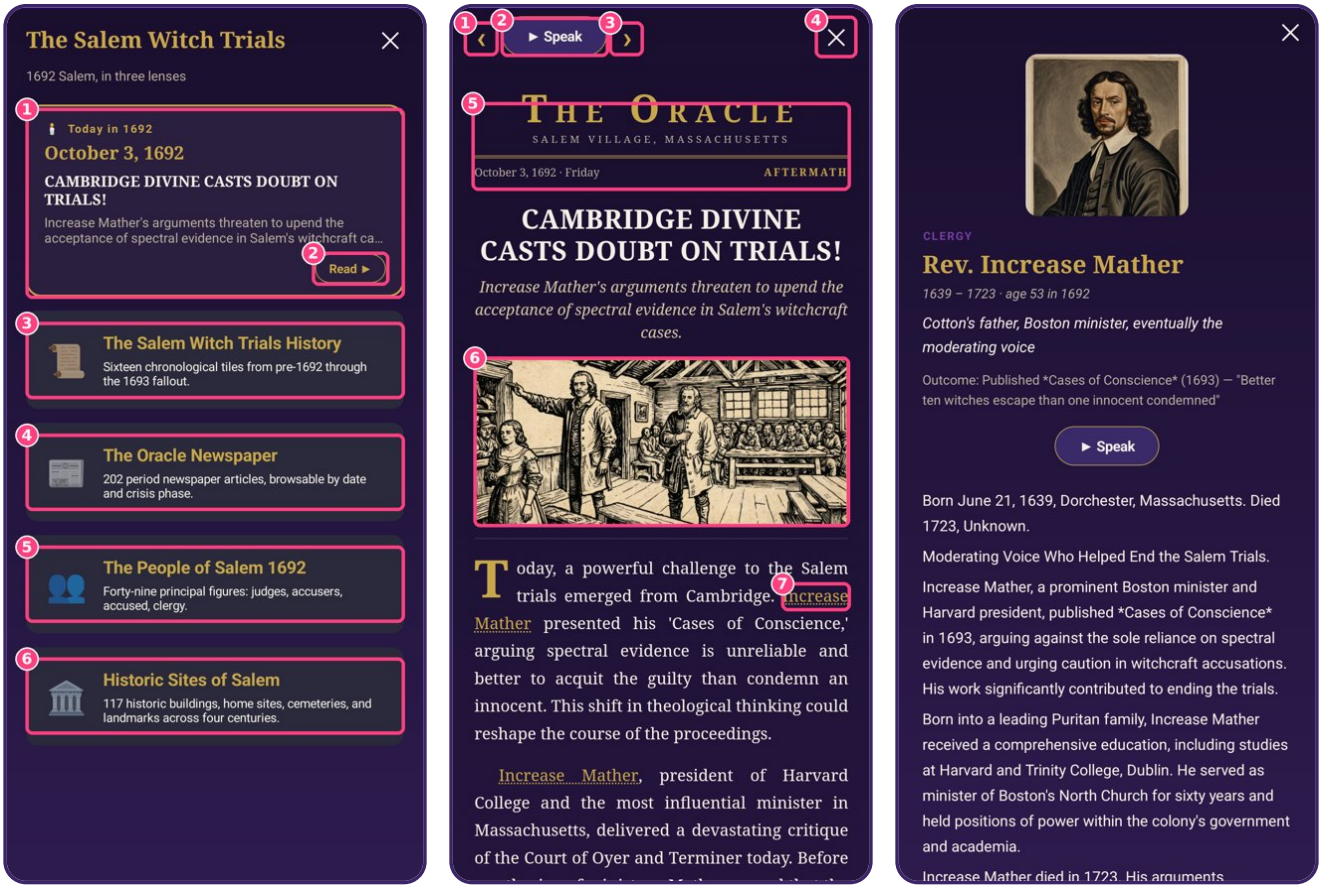

Historic Places → Federal → the map flies to the result.

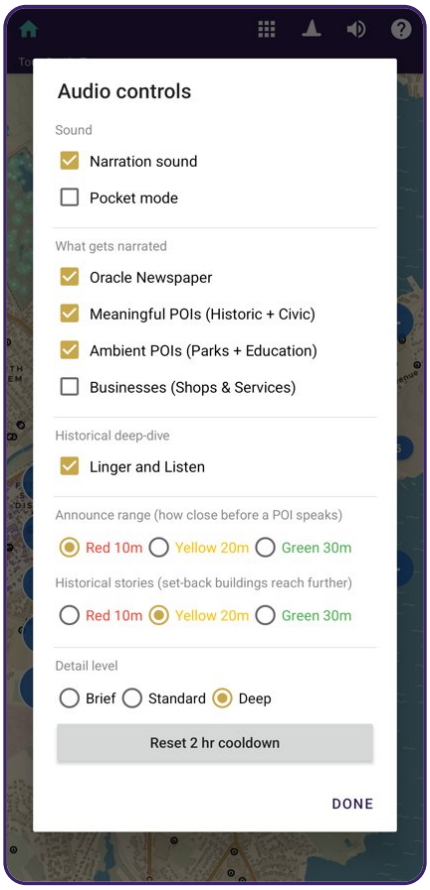

Favourite it → Directions → the turn list.

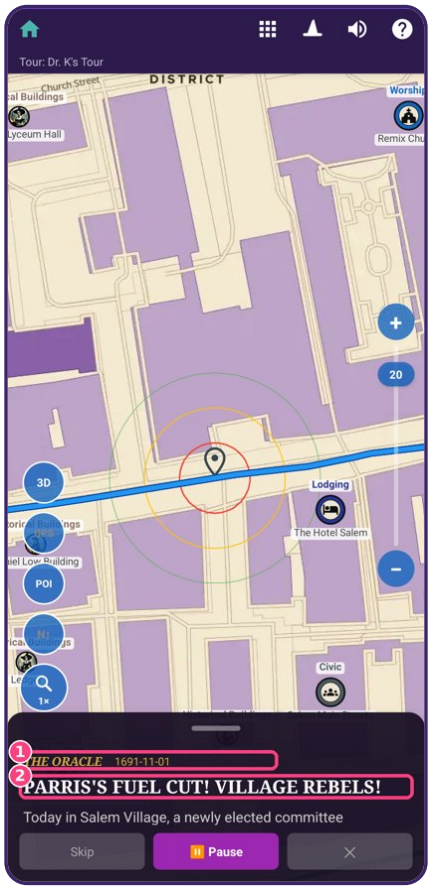

4.4 Read and hear today's Oracle

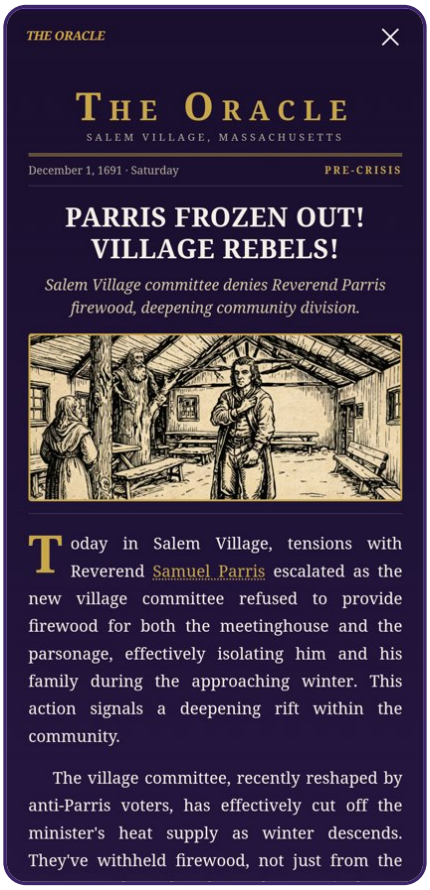

1. Menu → **Witch Trials**.
2. At the top, the **Today in 1692** card shows what the Oracle reported on today's date. Tap **Read ▶**.
3. Read the page — headline, woodcut and story. Tap **▶ Speak** to hear Dean read it.
4. Tap a gold name to meet that person; ✕ brings you back.
5. Use ‹ and › to travel day by day through the crisis.
6. Want the Oracle on your walk? Long-press the speaker, tick **Oracle Newspaper**, and walk — dispatches fill the quiet moments. Tap the Oracle banner for the full page.

Today in 1692 → the newspaper → a linked biography.

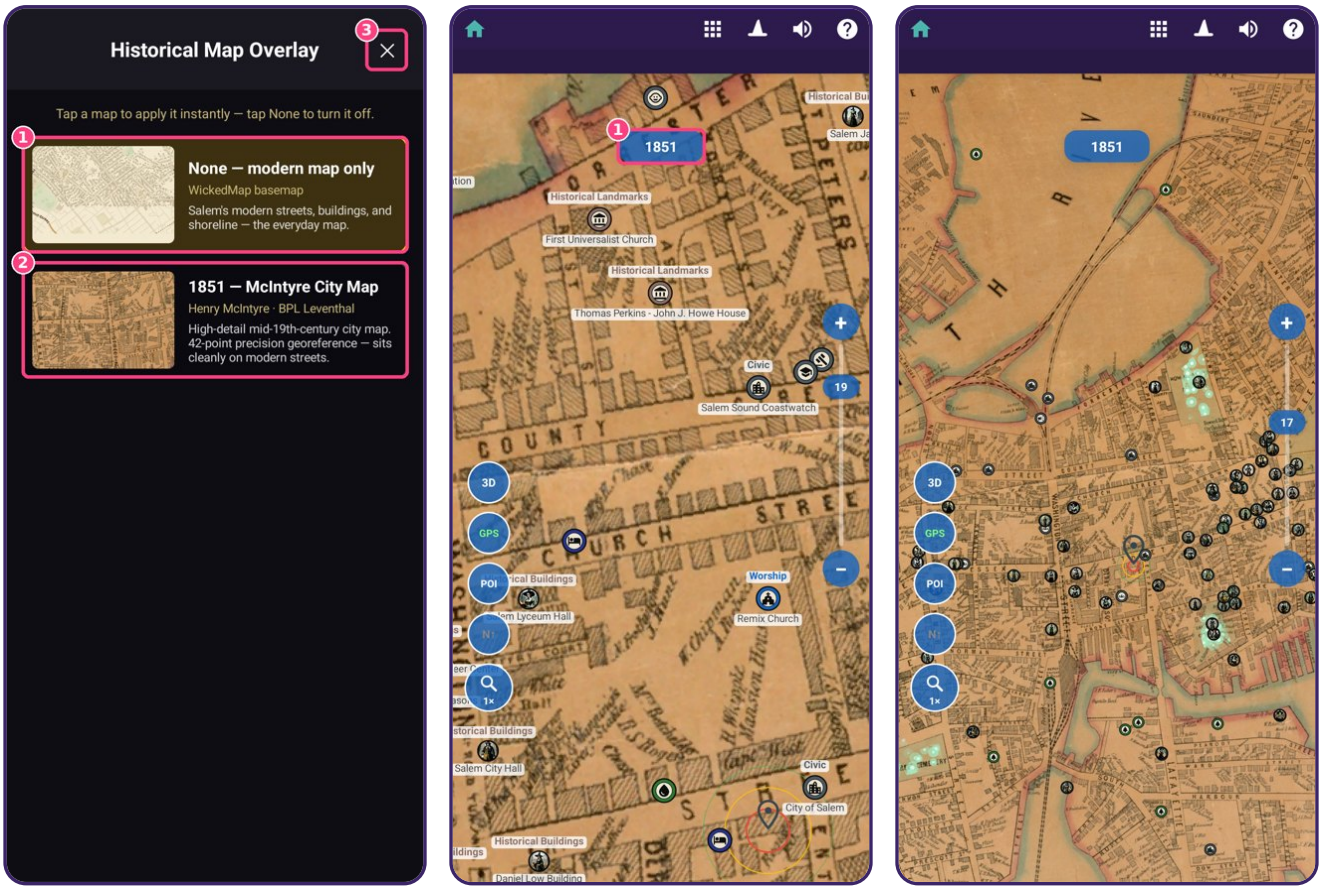

Oracle Newspaper ticked → the Oracle on the walk → its page opened from the banner.

4.5 See Salem in 1851

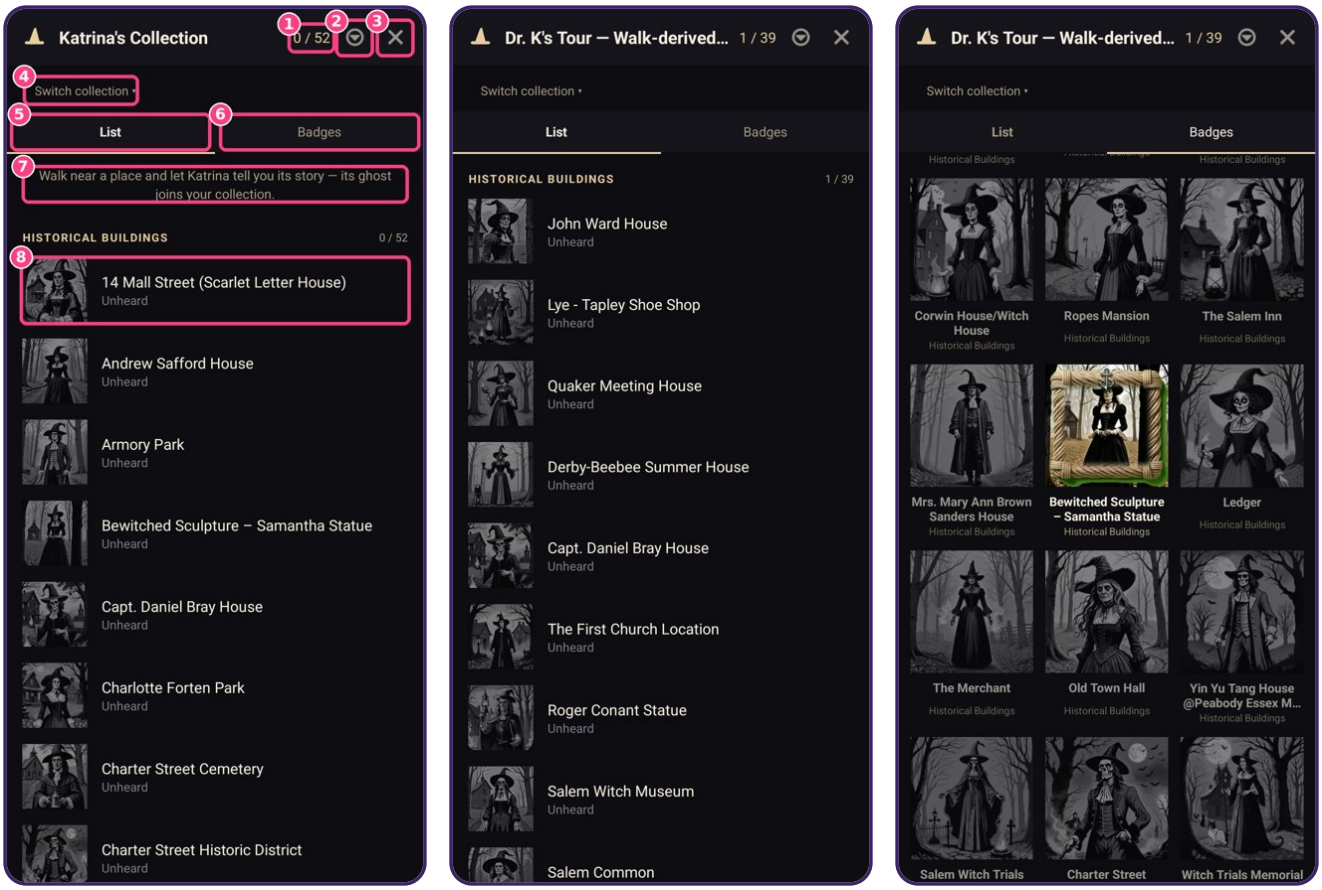

1. Menu → **Maps**.
2. Tap **1851 — McIntyre City Map**. The map changes at once and an **1851** tag appears.
3. Zoom out to see the 1851 harbour, wharves and shoreline.
4. Walk, tour and listen as usual — everything works on the old map.
5. Tap the **1851** tag, then **None**, to return to the modern map.

The picker → 1851 at street level → 1851 zoomed out.

4.6 Catch your first ghost

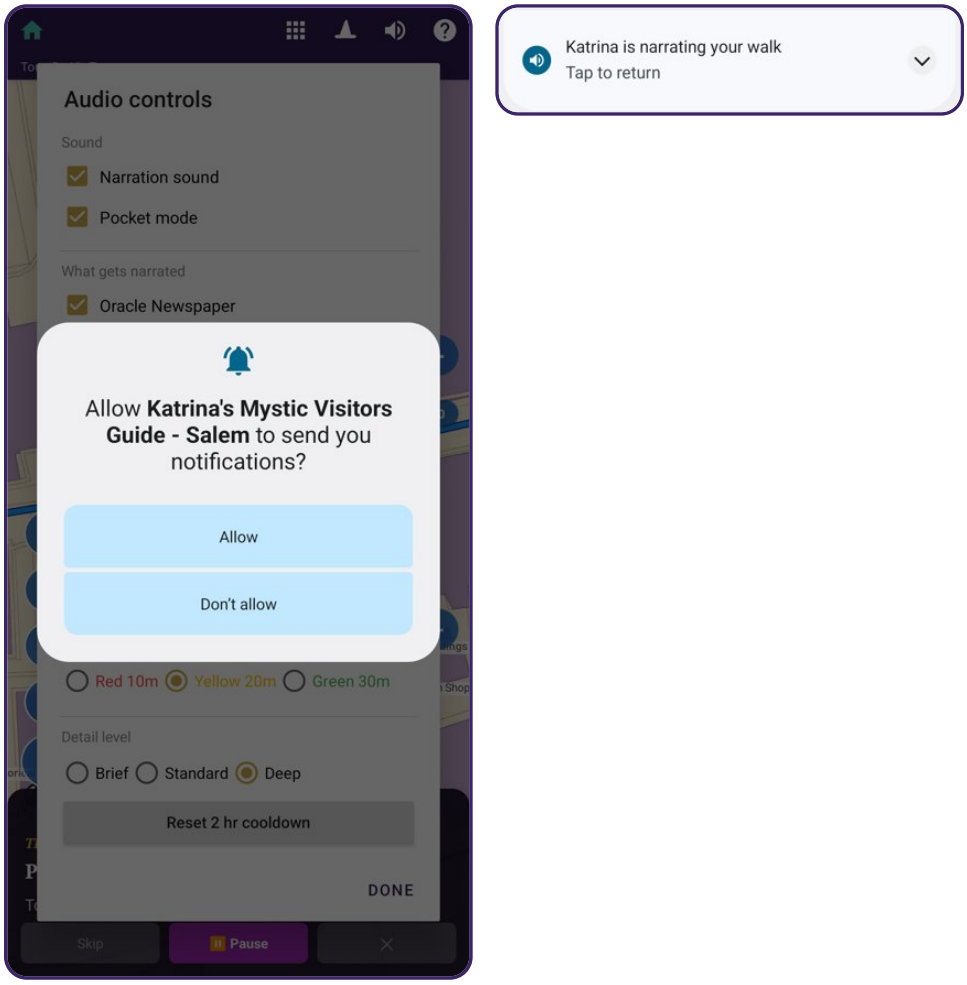

1. Walk (or Simu-Walk) near a historic building with a ghost — they appear on the map as small ghost portraits.
2. Let its story play. The ghost is now yours.
3. Tap the **witch hat**. Open **Badges**: your ghost is in full colour in a frame; the rest are grey shadows still to find.
4. During a tour, the counter shows your progress on that tour (for example *“1 / 39”*).

An empty collection → a tour's collection after a walk → the caught ghost.

4.7 Listen with the phone in your pocket

1. Long-press the speaker → tick **Pocket mode**.
2. On newer phones Android asks once whether the guide may show notifications — **Allow** lets you see and stop it from the notification.
3. Make sure **GPS** is green. Pocket mode only runs while the guide is following you.
4. Lock the phone and put it away. *“Katrina is narrating your walk”* appears in your notifications; stories keep coming as you walk.
5. Tap the notification to return to the map. Its **Stop** silences the guide and stops following your location; back in the app, tap **GPS** to follow you again.

Turning on Pocket mode (Android's notification question) → the notification while it runs.

PART 5 — HELP

When something does not seem right.

5.1 Troubleshooting

Problem	Try this
Nothing is talking	① Turn the **ringer on** — silent or vibrate keeps the narrators quiet. ② Long-press the speaker: is **Narration sound** ticked? ③ Is the place's group ticked (Meaningful POIs, Ambient POIs, Businesses)? ④ Is **GPS** green? ⑤ Did you hear it in the last two hours? Use **Reset 2 hr cooldown**.
A shop never speaks	Businesses are off by default. Tap **POI** (on) or tick **Businesses** in Audio controls.
Places speak too late / too early	Change the **Announce range** (Red is closest, Green reaches furthest).
Stories are too long	Set **Detail level** to Standard or Brief. Use **Skip** on the banner.
The map keeps jumping back to me	Turn **GPS** off while you look around; turn it on to follow again.
My position is wrong or wobbly	Allow **precise** location (the top line offers *"Location is approximate — tap for precise GPS"*). Tall buildings can bounce GPS; give it a moment.
It stops talking when the screen goes off	Turn on **Pocket mode** (2.10).
"Please reinstall from Google Play"	Uninstall, then install again from Google Play.
Text and icons are too small outside	Use the **Magnify** button (up to 3×).

5.2 Quick reference card

I want to…	Do this
Silence it now	Tap the speaker.
Hear the last story again	Tap the speaker when it is quiet.
Change what talks	Long-press the speaker → Audio controls.
Start a tour	Menu → Tours → Start Tour.
Hear a tour without walking	Menu → Simu-Walk → pick a tour.
Find a place	Menu → Find (tiles or search).
Walk to a place	Open its card → Directions.

See my ghosts	Tap the witch hat.
Read about 1692	Menu → Witch Trials.
See Salem in 1851	Menu → Maps → 1851.
Jump somewhere on the map	Long-press the map.
Save my hotel	Centre the map on it, long-press Home.
Keep listening, screen off	Audio controls → Pocket mode.
