

# Katrina's Mystic Visitors Guide

## Joining the iPhone test with Apple's TestFlight

Find the invitation · get TestFlight · use the invite · open the app

BEFORE YOU START

# What you need

- An iPhone running **iOS 16** or later.
- The **invitation email** from TestFlight: “Destructive AI Gurus, LLC has invited you to test Katrinas Mystic Visitors Guide.”
- **Wi-Fi** — the app is **1.08 GB**.

> **If TestFlight stops at a password screen:** open **Settings → your name → Media & Purchases** and check it is the Apple Account you mean to use — this happened on our own test iPhone.

## Five steps

1. Find the invitation email.
2. Get TestFlight from the App Store.
3. Start TestFlight.
4. Use the invite: View in TestFlight → Accept → Install.
5. Open the app.

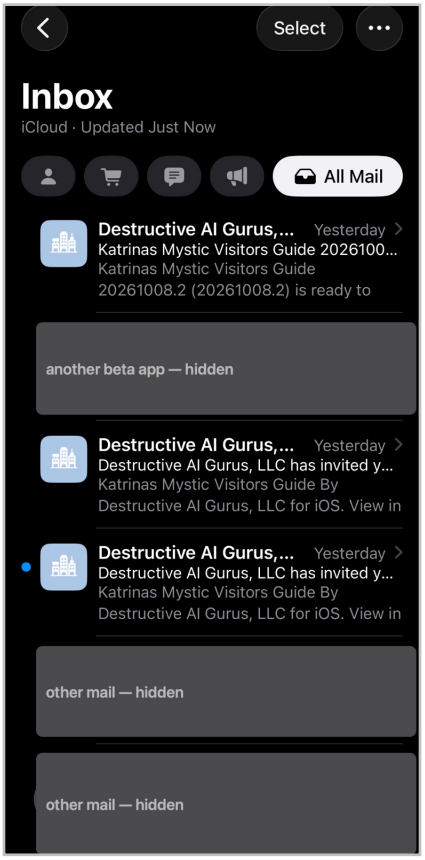

STEP 1

# Find the invitation email

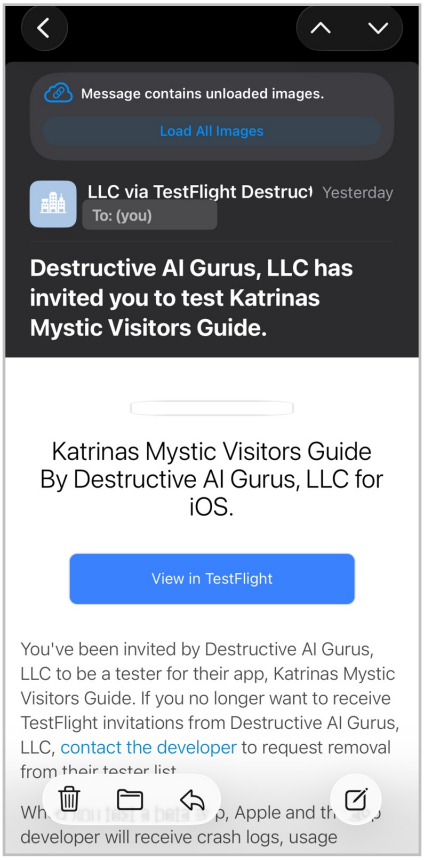

On your iPhone, open your email and look for **“Destructive AI Gurus, LLC has invited you to test Katrinas Mystic Visitors Guide.”** It comes **via TestFlight**.

Open it. It has a blue **View in TestFlight** button. Install TestFlight first (Step 2), then come back to this email (Step 4).

> **Not in your inbox?** Look in **Junk** or **Spam** — one of our own test invitations landed there.

The invitation in the inbox (other mail hidden)

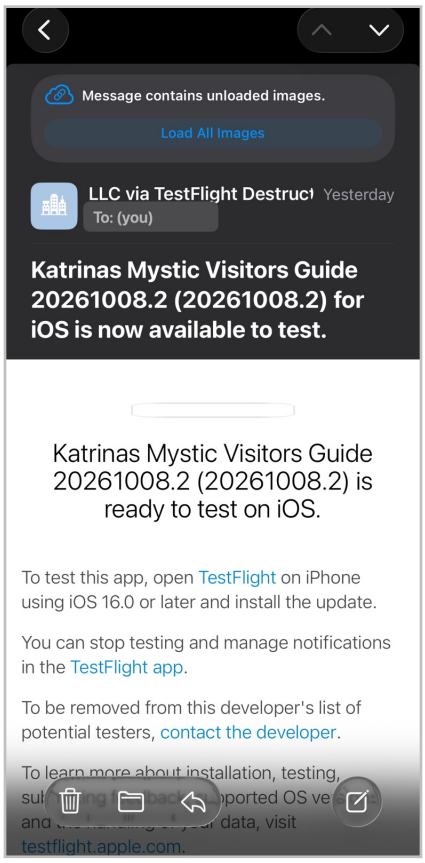

The invitation, opened

STEP 1 · WATCH OUT

# Not the invitation

Two other emails look alike:

- **"… 20261008.2 (20261008.2) for iOS is now available to test."** It says a version is ready — it is not the invitation. For your first time, use the invitation.
- An invitation to **another** app. Check that the email names **Katrinas Mystic Visitors Guide**.

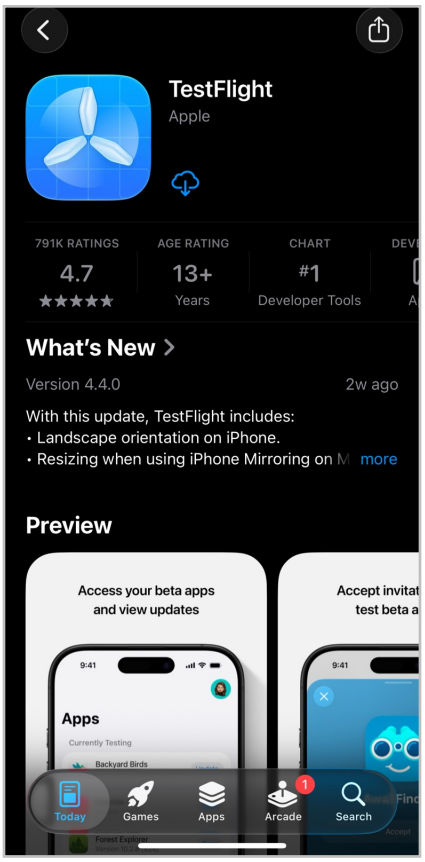

Not the invitation: "… is now available to test"

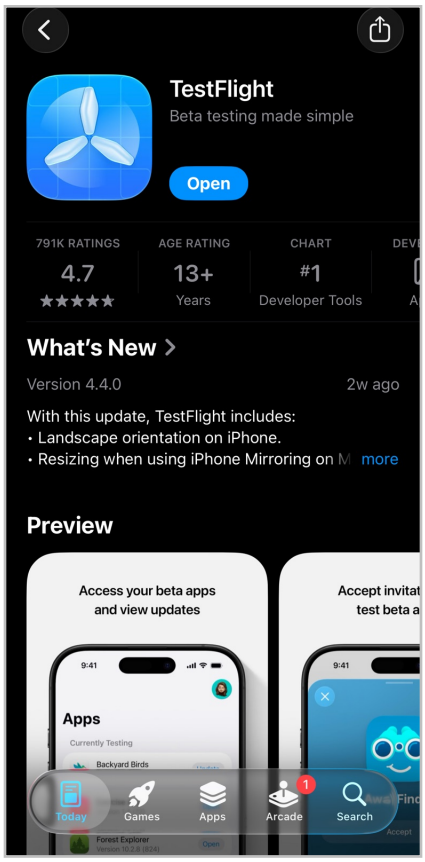

STEP 2

# Get TestFlight

Open the **App Store**, search for **TestFlight** (Apple's free app) and install it. When it finishes, the button reads **Open**.

TestFlight in the App Store

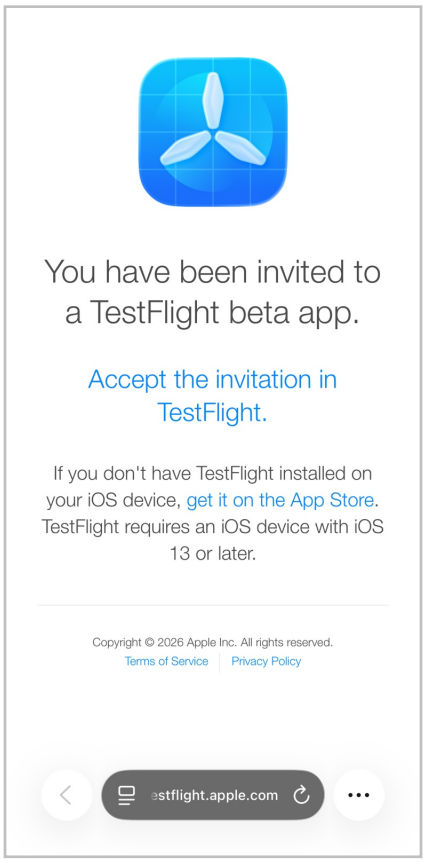

Installed — Open

STEP 2 · WATCH OUT

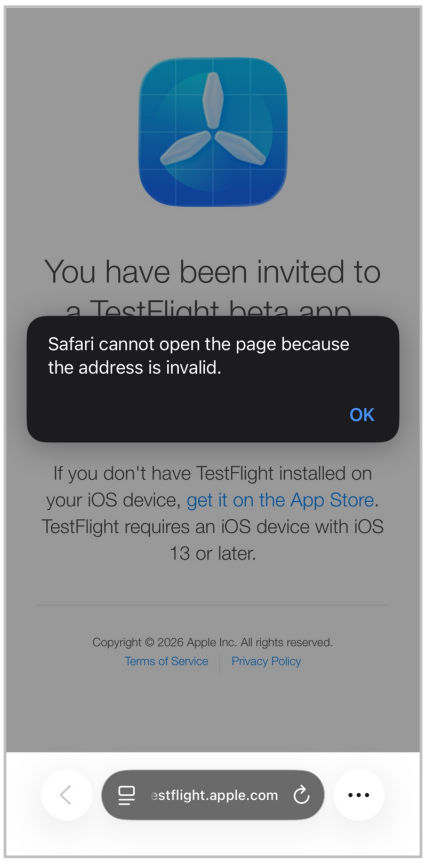

# If you tapped the invitation first

Tapping **View in TestFlight** before TestFlight is installed opens a TestFlight page in Safari.

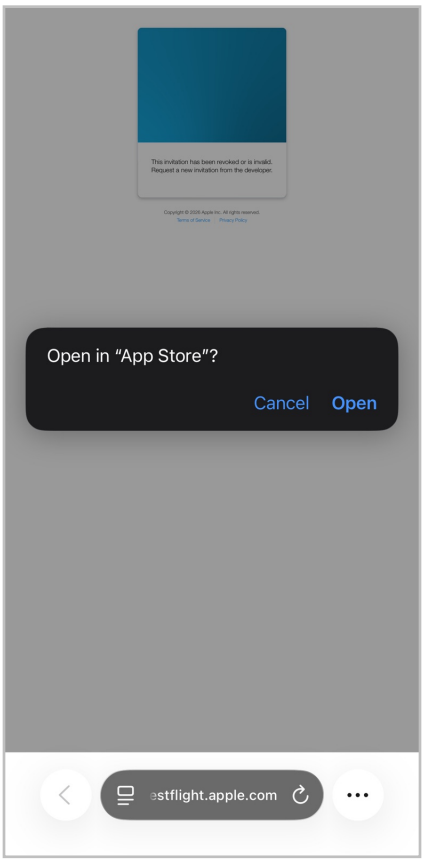

- **get it on the App Store** takes you to TestFlight — tap **Open** when asked.
- **Accept the invitation in TestFlight** does nothing yet: Safari says **“the address is invalid.”** Install TestFlight, then go back to the email.

The TestFlight page in Safari

Before TestFlight is installed

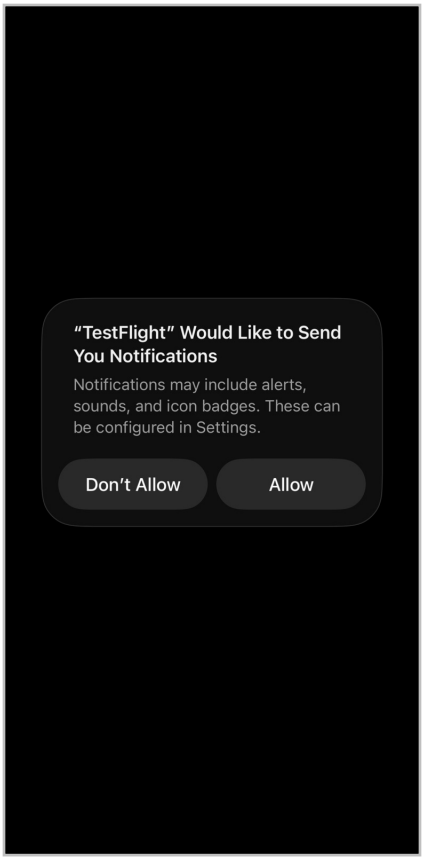

“Open in App Store?” — Open

STEP 3

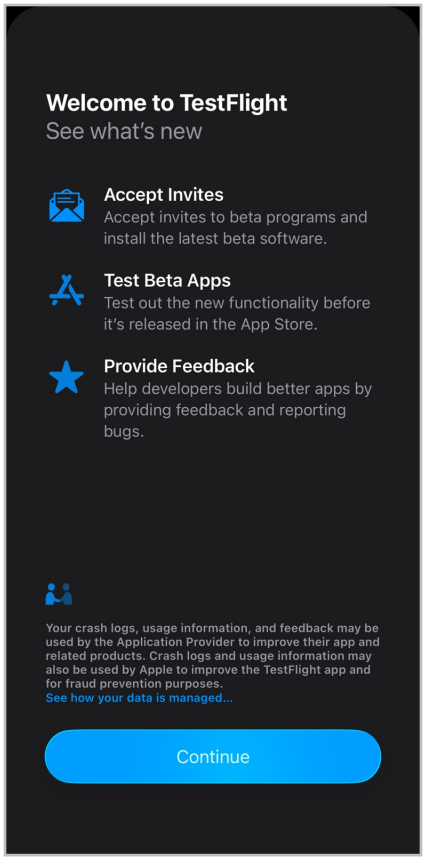

# Start TestFlight

Open TestFlight. It asks to send you **notifications** — your choice.

Then **Welcome to TestFlight** — tap **Continue**.

Notifications — your choice

Welcome — Continue

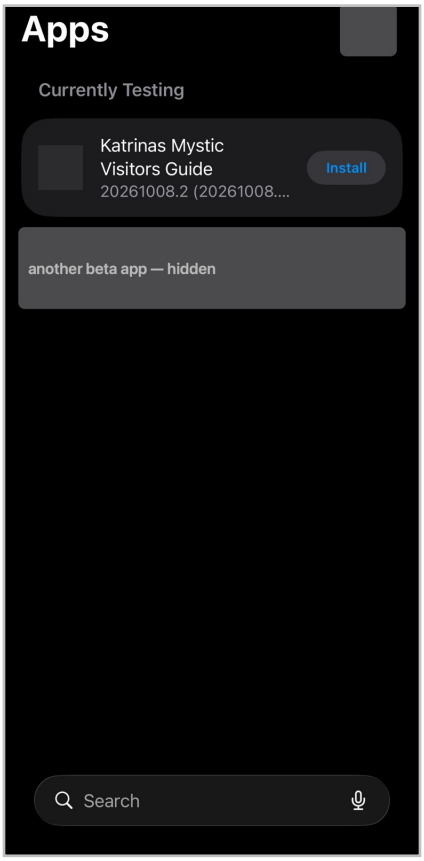

STEP 4

# Use the invite

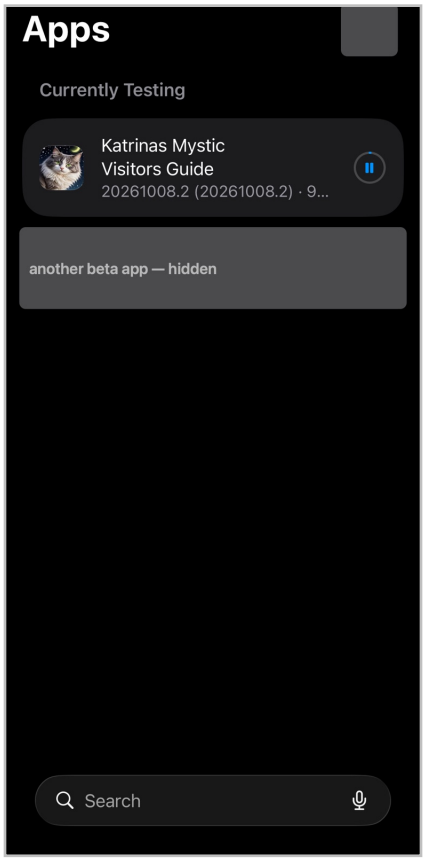

Go back to the invitation email and tap **View in TestFlight**. TestFlight opens the invitation: tap **Accept**.

> If TestFlight shows **Install** straight away, you are already set up — tap **Install**.

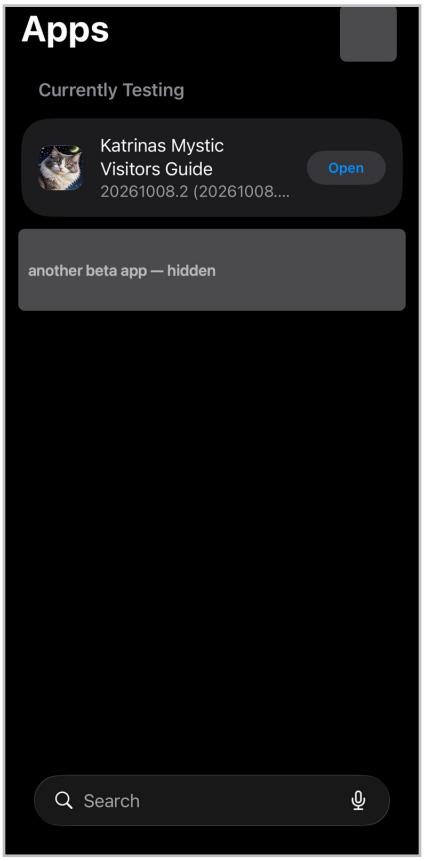

**Katrinas Mystic Visitors Guide** is now under **Currently Testing**. Tap **Install** and wait while it downloads. When it finishes, the button reads **Open**.

Install (another beta app hidden)

Downloading

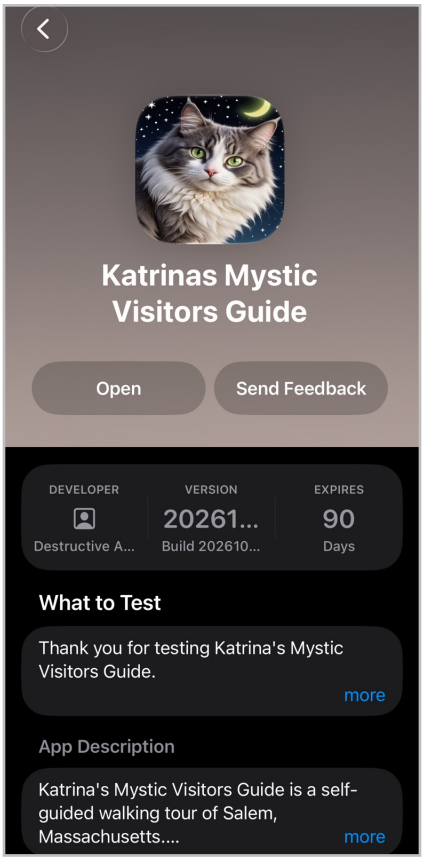

Installed — Open

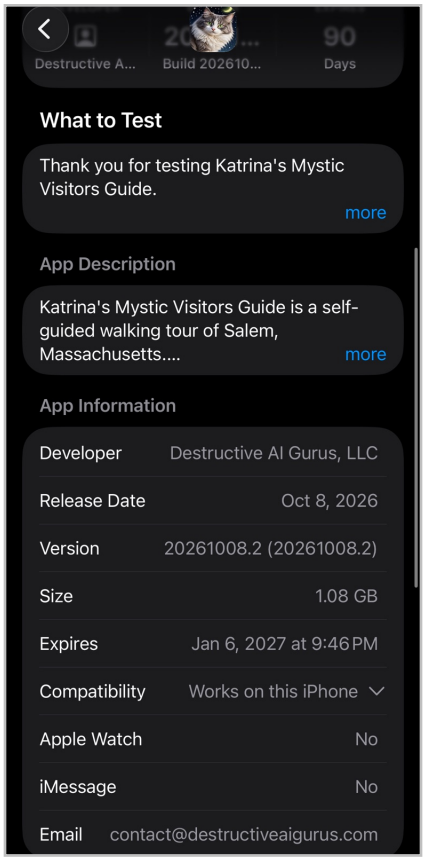

STEP 4 · GOOD TO KNOW

# The app's page in TestFlight

Tap the app's name to see its page: **Open**, **Send Feedback**, **What to Test**, and when this version **expires**.

The app's page

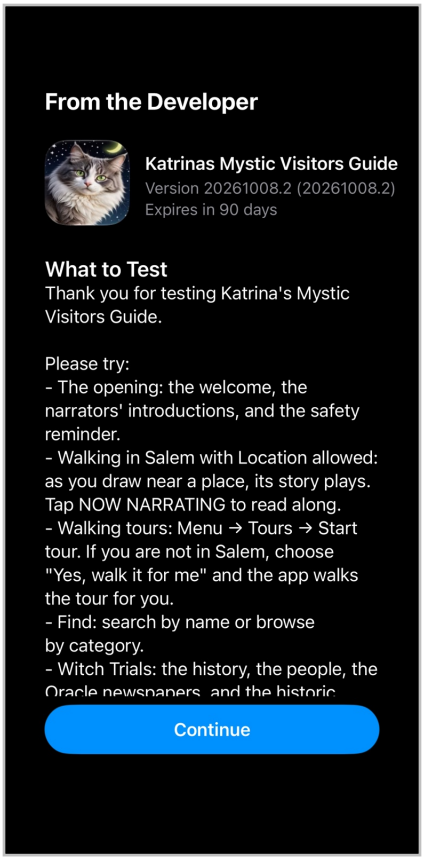

Version, size and expiry

STEP 5

# Open the app

Tap **Open**. The first time, TestFlight shows **From the Developer** — what we would like you to try — and then **Share Feedback**. Tap **Continue** on each.

> The app may already be speaking while these two TestFlight screens are showing.

From the Developer

Share Feedback

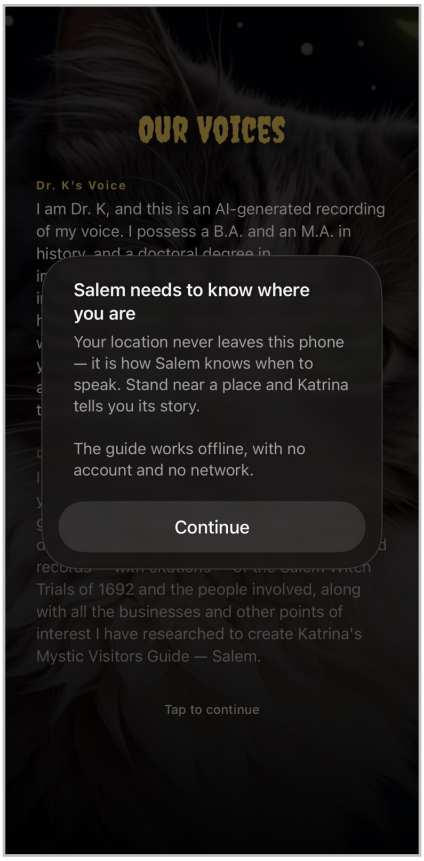

STEP 5

# The app's first screens

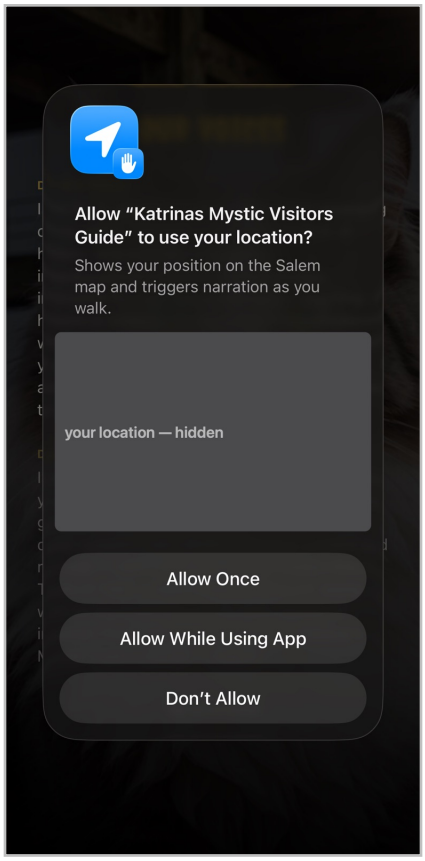

The opening: the welcome, the narrators' introductions, and the safety reminder.

- **Our Voices** — the narrators' introductions.
- **Salem needs to know where you are** — tap **Continue**. Then iOS asks to use your location: while the app is in use, it uses your location to show where you are on the map and to play each place's story as you draw near.
- The **safety reminder** — read it and tap **I understand**.

> This app uses AI-generated content: the narration is built from real voices, AI-simulated with permission from the narrators' own recordings, and the illustrated artwork is AI-generated.

Our Voices, with the location question

iOS asks (your location hidden)

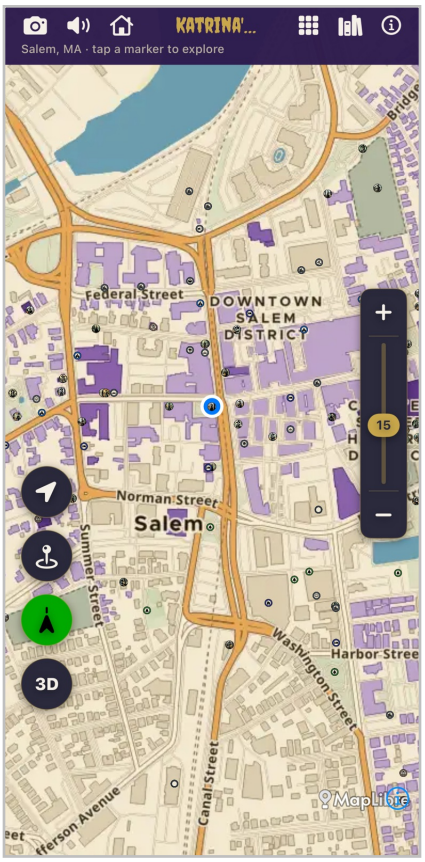

The safety reminder

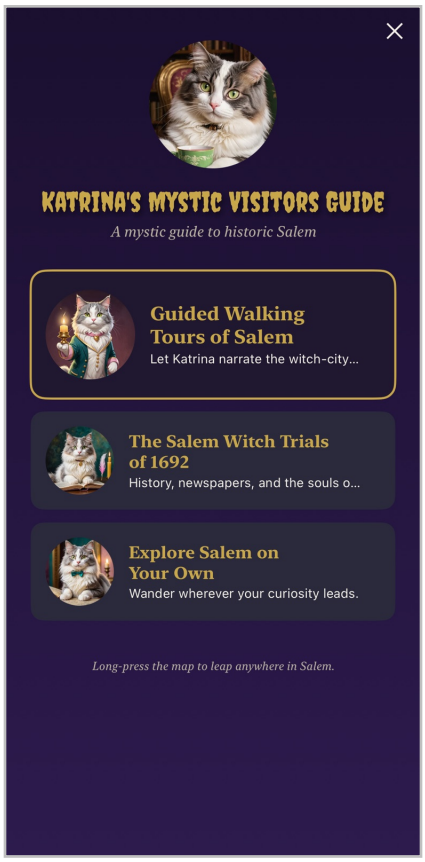

STEP 5

# You are in

The map opens, with the welcome: **Guided Walking Tours of Salem** · **The Salem Witch Trials of 1692** · **Explore Salem on Your Own**.

The welcome

GOOD TO KNOW

# After you install

- Each test version works for **90 days** — its page in TestFlight shows when it **expires**.
- When we send a newer version, TestFlight shows it with an **Update** button.
- Tell us anything that is confusing, wrong, or stops working. You can send feedback from the TestFlight app, or take a screenshot and add a note.
- TestFlight gives us crash reports and statistics about how you use the app, linked to your email address, plus any feedback you choose to send. Apple's full list: apple.com/legal/privacy/data/en/test-flight.
- Questions: **contact@destructiveaigurus.com**.
